TANRISE PROPERTY
CORPORATE STRATEGY 2026–2035

Beyond Development. Building Lasting Value.

Corporate Research, Competitive Intelligence, Brand Architecture & Transformation Roadmap

Prepared by Rubicube Creative · Strategic Discussion Draft

Prepared for Pak Hermanto, Bu Devina, and the TANRISE leadership team

Illustrative rendering · not a verified TANRISE project

01

Understanding TANRISE

From a Growing Developer to Indonesia’s Top Five.

TANRISE’s ambition is to become one of Indonesia’s top five publicly listed property developers by 2035, measured by revenue and net profit attributable to owners of the parent.

Achieving this requires a stronger business capable of sustained growth, dependable earnings, disciplined investment, and long-term value creation.

Ambition	Meaning
Leading	Compete at national scale
Trusted	Earn confidence through delivery
Best Concept	Create developments that answer real needs

The client’s current vision is to become a leading and trusted property developer delivering the best concepts.

From a Growing Developer to Indonesia’s Top Five.

The proposed transformation builds on this foundation by connecting portfolio growth, customer experience, asset productivity, and corporate reputation.

Core message: Top Five is a business transformation ambition requiring alignment between corporate strategy, brand strategy, and operational execution.

One Property Platform. Five Documented Business Pillars.

Founded in Sidoarjo in 2003, TANRISE has expanded from warehouses and shophouses into residential communities, commercial destinations, industrial developments, integrated townships, and hospitality assets.

The listed corporate entity is PT Jaya Sukses Makmur Sentosa Tbk — RISE.

The client’s investor presentation identifies five business pillars:

Business pillar	Portfolio examples
Integrated City	Tanrise Taman Dayu Pandaan; Tanrise Bandung; Tanrise City Sidoarjo; Swiss of Taman Dayu Pandaan
Community Living	Kyo Society; Grand Sunrise Menganti; Sunrise Residence Sidoarjo; Malang residential development

One Property Platform. Five Documented Business Pillars.

Business pillar	Portfolio examples
Business Districts	Voza Tower; Rame-Rame; Grand Central Bandung
Logistic & Industrial Park	Tritan warehouse developments; Tanrise Industrial Park Palembang; Tanrise Industrial Park Banjarbaru
Hotel, MICE, and Leisure	Vasa Hotel Surabaya; Vasa Suite Surabaya; Solaris assets; Cleo Business Hotels; Golf Taman Dayu; Driving Range

The wider client materials also identify ARC100, Midpoint Kayoon, and Bali Bites.

> Portfolio principle: Present existing assets and future developments together, with their status clearly distinguished.

From Individual Projects to a Broader Development Platform.

Period	Development stage	Portfolio development
2003–2013	Establishing the foundation	Warehouse and shophouse development; Tritan locations; Grand Sunrise; early Solaris hospitality developments
2015–2020	Expanding capabilities	Cleo Business Hotels; Vasa Hotel Surabaya; Voza Tower; ARC100 development; Kyo Society introduction; the 2018 IPO
2021–2026	Broadening the portfolio	TritanHub; ARC100 milestones; Kyo Society handover; Jumana Residence; Taman Dayu development; Vasa Suite Surabaya; Solaris villa expansion; commercial and industrial pipeline

From Individual Projects to a Broader Development Platform.

Period	Development stage	Portfolio development
2027–2035	Proposed next chapter	Scale validated development models, improve retained-asset performance, strengthen recurring income, and coordinate integrated destinations

THE CURRENT PIPELINE EXTENDS ACROSS SEVERAL SECTORS

- Tanrise Bandung.
- Tanrise City Sidoarjo.
- Swiss of Taman Dayu Pandaan.
- Malang residential development.

From Individual Projects to a Broader Development Platform.

- Grand Central Bandung.
- Tanrise Industrial Park Palembang.
- Tanrise Industrial Park Banjarbaru.
- Tritan Gresik.
- Tritan Gempol Pasuruan.
- VASA Ubud.
- VASA Bromo.
- VASA Canggu.
- VASA Malang.

From Individual Projects to a Broader Development Platform.

GOED Malang.

Strategic implication: The next phase should combine portfolio expansion with greater productivity, clearer positioning, and stronger execution across existing and future projects.

The Growth Gap Is Significant.

TANRISE’s FY2025 financial baseline:

≈ Rp410.7 billion

Consolidated revenue

≈ Rp87.2 billion

Net profit attributable to owners of the parent

These figures reconcile with the audited FY2025 financial statements.

The revenue gap to Summarecon’s reported FY2025 revenue of approximately Rp8.77 trillion is around 21 times.

Closing a gap of this magnitude would require sustained growth, substantial portfolio expansion, improved asset productivity, or a combination of these.

What the Portfolio Pipeline Must Demonstrate

- Which projects contribute development revenue.
- Which assets generate continuing operating income.
- When revenue and cash flow are expected to materialise.
- How much capital each initiative requires.
- How ownership interests affect attributable earnings.
- Whether the operating organisation can support expansion.

> Important distinction: Historical comparisons do not establish the financial threshold required to rank among the Top Five in 2035.

A Diversified Portfolio Creates Opportunity—and Demands Coordination.

TANRISE already has a broad portfolio and development pipeline. The strategic question is how effectively these assets work together.

Strategic question	Potential consequence if unresolved
Are corporate, destination, project, and operating-brand relationships clear?	Fragmented recognition and unclear accountability
Are existing and proposed project names consistently applied?	Customer confusion and duplicate portfolio reporting
Do business units share relevant customers, partners, and opportunities?	Missed commercial synergies

A Diversified Portfolio Creates Opportunity—and Demands Coordination.

Strategic question	Potential consequence if unresolved
Are retained assets optimised?	Underdeveloped recurring income
Are customer and service standards consistent?	Uneven trust and experience
Are investments evaluated through a common framework?	Unclear priorities and inefficient capital allocation

These are strategic hypotheses for validation.

The differences between the investor and brand portfolio decks demonstrate the need for one approved portfolio register covering names, status, ownership, operating responsibility, and naming transitions.

A Diversified Portfolio Creates Opportunity—and Demands Coordination.

Recommendation: Validate the diagnosis through financial analysis, operational interviews, customer research, and project audits.

Create More Value Across the Full Life of Each Development.

TRADITIONAL DEVELOPMENT CYCLE

Land Acquisition › Development › Marketing › Sales › Handover

PROPOSED CONTINUING-VALUE CYCLE

Development › Activation › Occupancy › Experience › Management › Recurring Value

APPLICATION ACROSS TANRISE

- Integrated City: Coordinate residential, commercial, leisure, infrastructure, and partner-led facilities.
- Community Living: Build trust through relevant housing concepts, delivery, and continued customer care.

Create More Value Across the Full Life of Each Development.

- Business Districts: Improve tenant mix, occupancy, visitation, and commercial relevance.
- Logistic & Industrial Park: Support occupier requirements, infrastructure readiness, and business continuity.
- Hotel, MICE, and Leisure: Improve utilisation, guest experience, operating performance, and destination appeal.

Strategic thesis: TANRISE should strengthen its development capabilities while creating more long-term value from the places and assets it develops.

02

Competitive intelligence

The Top Five Is a Moving Target.

To make the 2035 ambition measurable, TANRISE should track two parallel league tables:

- 1. Annual consolidated revenue.
- 2. Net profit attributable to owners of the parent.

Assets, market capitalisation, marketing sales, and recognised revenue should be reported separately.

BENCHMARKING PRINCIPLES

- Define an agreed listed-property peer group.
- Use consistent accounting periods.
- Separate listed issuers from private developer groups.
- Consider related issuers and consolidation effects.

The Top Five Is a Moving Target.

Distinguish development income from recurring operating income.

Compare attributable profit consistently.

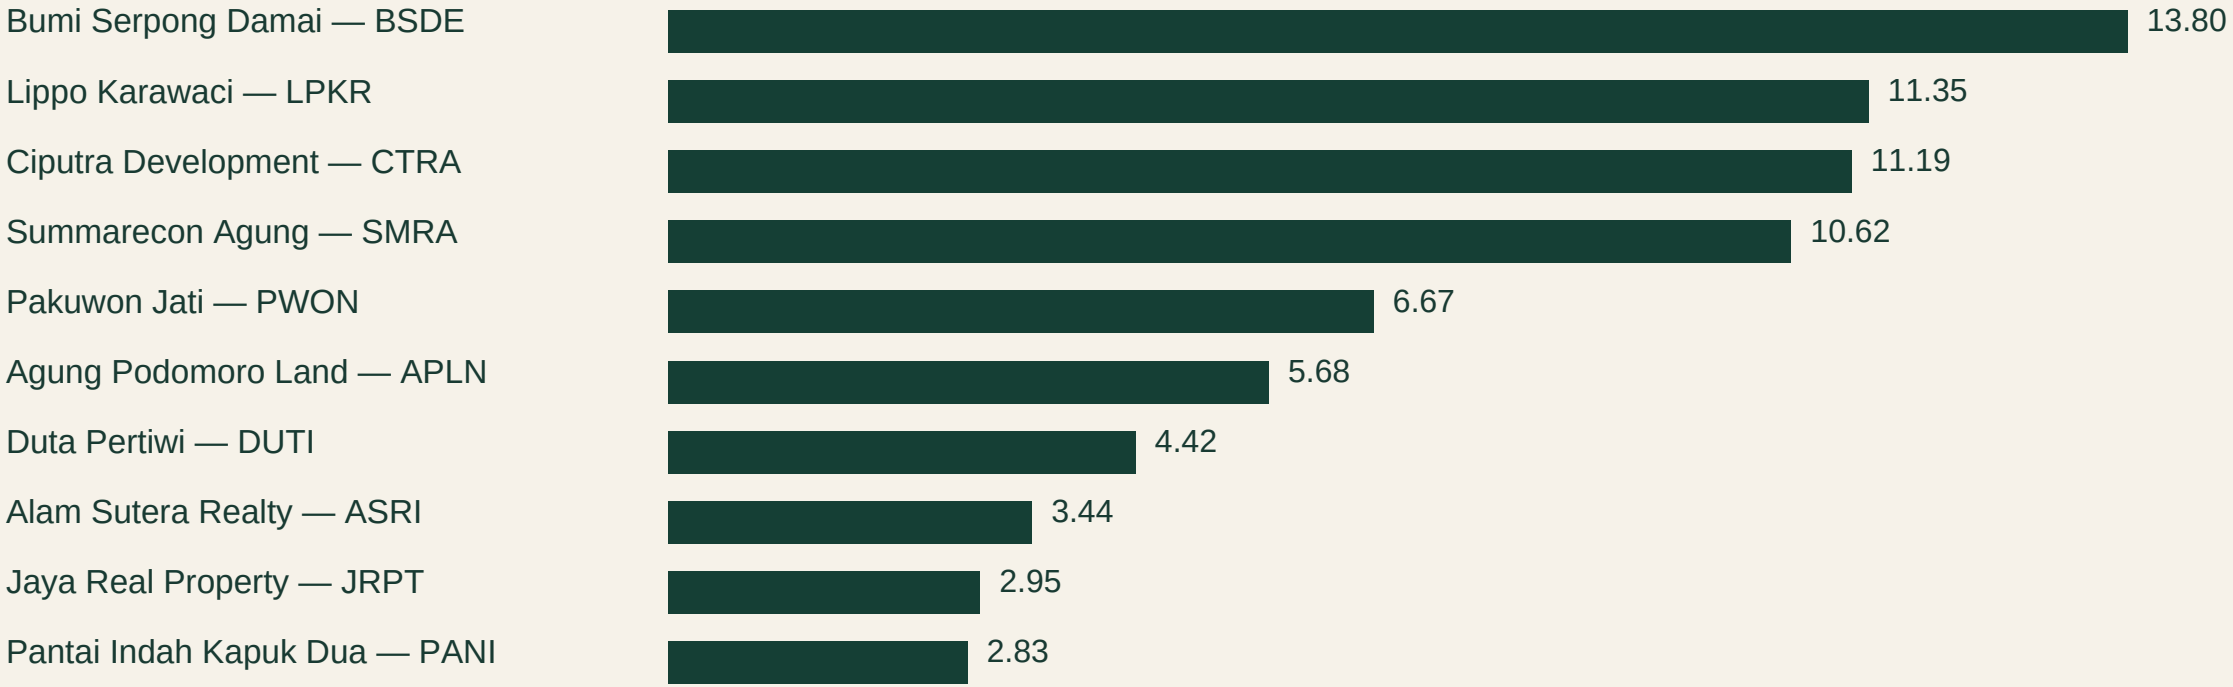

Strategic implication: TANRISE's pipeline should be evaluated against the scale, timing, and earnings quality required to progress toward the ambition.

A Historical Baseline for Understanding Competitive Scale.

The following reproduces the research draft’s FY2024 revenue baseline. It is not a verified FY2025 ranking.

A Historical Baseline for Understanding Competitive Scale.

FY2024 · Revenue, Rp trillion · Historical baseline; validation required

A Historical Baseline for Understanding Competitive Scale.

Source cited in the original research draft: IDXChannel, 21 April 2025.

Interpretation: TANRISE competes against companies with substantially greater financial scale, although their business models and revenue composition differ.

Validation requirement: Reconcile the ranking and individual figures before external presentation.

Different Developers. Different Engines of Advantage.

Developer or group	Recognised strength	Competitive lesson
BSD / Sinar Mas Land	Large-scale integrated townships	Build economic anchors, connectivity, and institutional partnerships
Ciputra	Replicable township development	Standardise capabilities while adapting to local markets
Summarecon	Community building and estate management	Make the post-handover experience a competitive asset
Pakuwon	Income-producing mixed-use assets	Develop recurring revenue alongside property sales
Agung Sedayu / PIK	Destination and lifestyle activation	Create visitation and desire for the wider location

Different Developers. Different Engines of Advantage.

Developer or group	Recognised strength	Competitive lesson
Lippo	Diversified property platforms	Maintain portfolio and capital discipline
Paramount Land	Commercialisation and residential segmentation	Match products, positioning, and launches to demand
Alam Sutera	Township environment and lifestyle appeal	Connect public realm, amenities, and place identity
Agung Podomoro	High-density mixed-use development	Understand integration benefits and execution exposure
Intiland	Mixed-use, industrial, and investment property	Balance development income with operating assets

Different Developers. Different Engines of Advantage.

Application to TANRISE: Select mechanisms suited to its existing assets, pipeline, capital capacity, and delivery capabilities.

The City Becomes More Valuable as Its Ecosystem Matures.

Development journey Township and residential development expanded into commercial districts, education, technology, retail, and mobility infrastructure.

Success mechanism Complementary institutions and activities increase the usefulness and attractiveness of the location.

Competitive advantage Long-term planning, substantial development scale, and institutional and commercial partnerships.

Risk Large townships require patient capital, infrastructure investment, and careful phasing.

APPLICATION TO TANRISE

For Tanrise City Sidoarjo and Tanrise Bandung, evaluate the anchors that support everyday life and commercial activity:

The City Becomes More Valuable as Its Ecosystem Matures.

- Schools and education partners.
- Convenient retail and supermarkets.
- Transport access.
- Employment and business activity.
- Public and community facilities.
- Essential services.

These are strategic development priorities, not claims that all facilities are already committed.

> Key principle: Build the reasons to live there alongside the homes.

Build a Development Capability That Can Be Repeated.

Development journey Early residential and township projects developed into a geographically diversified portfolio.

Success mechanism A recognisable approach combines housing, commercial facilities, and supporting amenities across different markets.

Competitive advantage Replicable capabilities and a broad project portfolio.

Risk Geographic diversification introduces varying demand, execution, and inventory risks.

APPLICATION TO TANRISE

Create a repeatable development framework for:

- Grand Sunrise Menganti.
- Sunrise Residence Sidoarjo, subject to confirmation of the Jumana naming transition.

Build a Development Capability That Can Be Repeated.

- Malang residential developments.
- Residential components within Tanrise Bandung and Tanrise City Sidoarjo.

Standardise site selection, research, feasibility, design principles, pricing, phasing, and customer experience while adapting each project to its market.

> Key principle: Standardise the method. Localise the concept.

A Community’s Value Continues After Handover.

Development journey From Kelapa Gading into multiple integrated township developments.

Success mechanism Combine residential products, commercial facilities, lifestyle destinations, and long-term township management.

Competitive advantage Recognisable development identity and continuing community management.

Risk Estate operations require consistent funding, governance, and service delivery.

APPLICATION TO TANRISE

Translate CINTA and Super-Serving into measurable commitments across:

- Grand Sunrise Menganti.
- Kyo Society.

A Community’s Value Continues After Handover.

- Sunrise Residence Sidoarjo.
- Tanrise Taman Dayu Pandaan.
- Future residential phases in Bandung, Sidoarjo, and Malang.

Establish estate-management standards, maintenance responsibilities, resident communication, and service-performance measures appropriate to each project.

> Key principle: The relationship begins at purchase. Trust is earned afterward.

The Asset Should Continue Earning After It Is Built.

Development journey Shopping centres and commercial assets evolved into integrated retail, office, residential, and hospitality developments.

Success mechanism Retain productive assets and combine complementary property uses.

FY2025 measure	Reported figure
Revenue	Approximately Rp7.11 trillion
Recurring revenue share	Approximately 79%

Risk Retained assets require substantial capital and remain exposed to occupancy, operating costs, and changing consumer behaviour.

Source: Pakuwon’s FY2025 annual report.

Application to TANRISE

Evaluate long-term income potential across:

- Voza Tower.
- Rame-Rame.
- Midpoint Kayoon.
- Grand Central Bandung.
- Bali Bites.
- Hotel and villa assets.
- Golf Taman Dayu and the Driving Range.

Source: Pakuwon’s FY2025 annual report.

The Asset Should Continue Earning After It Is Built.

Selected warehouse and industrial properties.

Choose what to sell, retain, lease, or operate with partners based on asset-level economics.

Key principle: Development creates the asset. Management compounds its value.

Source: Pakuwon’s FY2025 annual report.

Destinations Create Demand Before the Property Transaction.

Development approach Curated culinary, retail, leisure, and public experiences give destinations a recognisable identity.

Success mechanism People actively want to visit, experience, and associate with the place.

Competitive advantage Destination storytelling, tenant curation, and market visibility.

Risk Visitor traffic does not automatically produce profitable operations or higher property returns.

APPLICATION TO TANRISE

Build on existing destination components:

- Tanrise Taman Dayu Pandaan.
- Golf Taman Dayu.

Destinations Create Demand Before the Property Transaction.

- The Driving Range.
- Rame-Rame.
- Bali Bites and its F&B activity.

Evaluate future activation opportunities within Swiss of Taman Dayu Pandaan, Tanrise Bandung, and Tanrise City Sidoarjo.

Measure visitation, spending, repeat participation, operating contribution, and conversion into property enquiries and sales.

> Key principle: Let people experience the destination before asking them to invest in it.

Select the Mechanisms That Fit TANRISE.

Business model	Strength	Structural vulnerability
Township expansion	Scalable development pipeline	Infrastructure and capital intensity
Residential replication	Repeatable sales model	Market cycles and inventory exposure
Mixed-use development	Complementary uses and customer activity	Concentrated asset and execution risk
Recurring-income assets	Continuing revenue	Long payback periods and operating costs
Destination-led development	Place identity and visitation	Activation cost and demand uncertainty

Select the Mechanisms That Fit TANRISE.

These are business-model risks rather than claims that particular competitors are failing.

IMPLICATION FOR TANRISE

The company already has exposure to several of these models.

The priority is to establish which combinations create the best risk-adjusted value across its five business pillars.

> Recommendation: Scale models supported by demand, investment capacity, operating capability, and demonstrated performance.

A More Human, More Accountable Developer.

TANRISE can build differentiation through five commitments.

- 1. Purposeful Development Begin every project with a real human or business need.
- 2. Visible Commitments Clearly distinguish existing facilities, ongoing development, future plans, and proposed partnerships.
- 3. Connected Experiences Coordinate property, services, partners, and community activity across relevant assets.
- 4. Continued Care Maintain relationships beyond the initial transaction.
- 5. Disciplined Investment Build developments and operating ecosystems that can be sustained commercially.

What This Means for Portfolio Communication

Customers and investors should be able to understand:

- What the project is called.
- Where it is located.
- Whether it exists or is planned.
- Who owns or develops it.
- Who operates or manages it.
- What has been committed.
- What remains proposed.

A More Human, More Accountable Developer.

These are proposed differentiation territories requiring validation against competitor practices and TANRISE’s capabilities.

03

Corporate and portfolio architecture

Clarify the Relationship Between TANRISE, TANLY, and the Projects.

TANCORP publicly presents TANRISE Property and TANLY Hospitality as separate business platforms.

Clarify the Relationship Between TANRISE, TANLY, and the Projects.

LEVEL / ROLE

TANCORP

Wider group context

TANRISE Property

Property development and investment platform

TANLY Hospitality

Hospitality management platform

Destination and project brands

Customer-facing identities of individual places and developments

Hotel and operating brands

Hospitality and service identities associated with managed properties

Clarify the Relationship Between TANRISE, TANLY, and the Projects.

A hospitality property may form part of TANRISE’s investment portfolio while having a management relationship with TANLY.

The diagram should distinguish corporate affiliation, asset interests, and operating relationships.

TANRISE’S FIVE DOCUMENTED BUSINESS PILLARS

- 1. Integrated City.
- 2. Community Living.
- 3. Business Districts.
- 4. Logistic & Industrial Park.
- 5. Hotel, MICE, and Leisure.

Separate Branding Classification

The client’s brand portfolio deck additionally uses Residential & Township, High-Rise Building, Commercial & Retail, Hotels & Leisure, Education, and Healthcare.

These product categories should not automatically be presented as separate operating subsidiaries.

Preserve the Portfolio. Make Its Status Clear.

Business pillar	Existing assets and documented portfolio references	Ongoing or upcoming development
Integrated City	Tanrise Taman Dayu Pandaan	Tanrise Bandung; Tanrise City Sidoarjo; Swiss of Taman Dayu Pandaan
Community Living	Kyo Society; Grand Sunrise Menganti; Jumana Residence / Sunrise Residence Sidoarjo naming transition; ARC100 as an additional documented apartment brand	Malang residential development, with Sunrise Residence Malang, Sunrise Garden Malang, and Grand Sunrise Malang naming to reconcile

Preserve the Portfolio. Make Its Status Clear.

Business pillar	Existing assets and documented portfolio references	Ongoing or upcoming development
Business Districts	Voza Tower; Rame-Rame; Bali Bites; Midpoint Kayoon as an additional client portfolio reference requiring status confirmation	Grand Central Bandung
Logistic & Industrial Park	Tritan Surabaya; Tritan Medan; Tritan Wedi 1 and 2; Tritan Taman; Tritan Southgate; TritanPoint and TritanHub brand references	Tritan Gresik; Tritan Gempol Pasuruan; Tanrise Industrial Park Palembang; Tanrise Industrial Park Banjarbaru

Preserve the Portfolio. Make Its Status Clear.

Business pillar	Existing assets and documented portfolio references	Ongoing or upcoming development
Hotel, MICE, and Leisure	Vasa Hotel Surabaya; Vasa Suite Surabaya; three Cleo Business Hotel locations; Solaris hotel and villa assets in Bali and Malang; Golf Taman Dayu; Driving Range	Ongoing: VASA Ubud and VASA Bromo. Upcoming: VASA Canggu, VASA Malang, and GOED Malang

PORTFOLIO RULES

- Do not count a proposed renaming as an additional project.
- Do not treat all TANLY-managed properties as automatically owned by TANRISE.

Preserve the Portfolio. Make Its Status Clear.

- Do not convert scheduled development dates into confirmed operating status.
- Retain established project names unless a naming change has been approved and implemented.
- Reconcile ownership percentages separately from the brand diagram.

> Supporting detail: The complete project and naming register appears in Appendix A.

Preserve Recognition. Clarify Relationships.

Brand level	Proposed principle
TANRISE	Corporate reputation and property-development endorsement
Business pillars	Descriptive portfolio categories
Integrated destinations	Preserve recognisable destination names
Residential and commercial projects	Retain approved customer-facing project identities
Hospitality brands	Preserve operating-brand identity and identify management relationships accurately

Naming Transitions Shown in the Client’s Brand Portfolio Deck

Jumana Residence → Sunrise Residence Sidoarjo
Shown as a “Before/After” proposal. Treat as one project with a naming transition, subject to implementation confirmation.

Grand Sunrise → Location-Based Grand Sunrise
Naming Examples include Grand Sunrise Menganti and Grand Sunrise Malang.

TritanPoint / TritanHub → TRITAN + Location
Shown as a proposed consolidated warehouse-brand system.

Tanrise Industrial Park + Location Used for industrial-park naming, with the asset status of each location verified separately.

PROPOSED ENDORSEMENT EXAMPLES

CORPORATE-LED DESTINATION

TANRISE CITY SIDOARJO

ENDORSED PROJECT

KYO SOCIETY A DEVELOPMENT BY TANRISE

LOCATION-BASED LOGISTICS BRAND

TRITAN GRESIK BY TANRISE

HOSPITALITY RELATIONSHIP

Identify the approved hotel brand, asset company, and TANLY management relationship where relevant.

> Validation note: Endorsement wording and legal attribution require review before use. “The House of VASA” is not established as the approved umbrella by the two supplied decks.

One Destination Can Connect Several Businesses.

TANRISE TAMAN DAYU PANDAAN

The wider destination connects residential development with golf, recreation, hospitality, and visitor activity.

Documented components include:

- Tanrise Taman Dayu Pandaan.
- Golf Taman Dayu.
- Driving Range.
- Swiss of Taman Dayu Pandaan as an ongoing development.

Destination-wide planning should preserve the distinction between these assets and their ownership and operating arrangements.

Tanrise Bandung

An ongoing integrated development with residential and commercial potential.

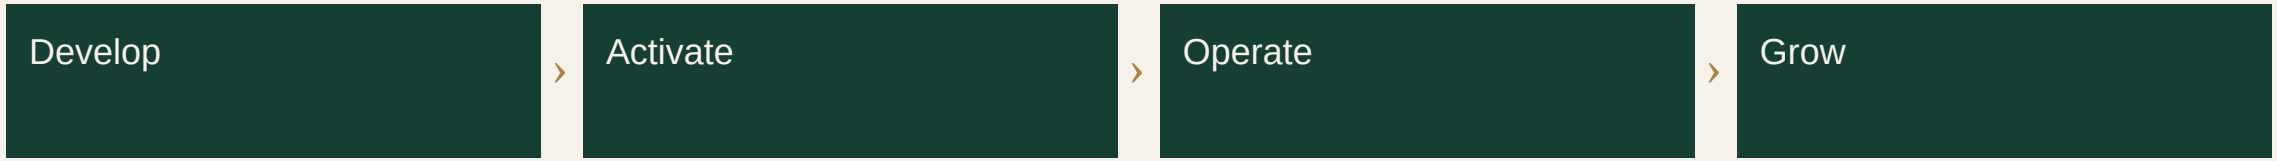

Grand Central Bandung is identified as a commercial project within the broader Bandung development site.

TANRISE CITY SIDOARJO

An ongoing integrated-city project.

Its long-term development strategy should coordinate housing, infrastructure, commercial activity, and appropriate partner-led facilities.

PROPOSED VALUE-CREATION CYCLE

One Destination Can Connect Several Businesses.

- Develop relevant places.
- Activate them through tenants, institutions, services, and experiences.
- Operate retained assets and customer relationships.
- Grow income, asset productivity, and reinvestment capacity.

Education, healthcare, wellness, and memberships should be labelled as proposed or partner-led opportunities unless a specific committed facility or operating business is confirmed.

04

Three corporate brand platform options

Choosing How TANRISE Will Be Known in Its Next Chapter.

The three proposed directions share a foundation of trust, purposeful concepts, and long-term value.

Dimension	Option 01	Option 02	Option 03
Strategic territory	Development excellence	Human-centred placemaking	Integrated value ecosystems
Brand idea	Building Tomorrow’s Places	Elevating Life	Creating Lasting Value
Primary emphasis	What we build	Why we build	What our developments enable
Emotional appeal	Confidence	Belonging and progress	Opportunity and prosperity
Commercial emphasis	Development and sales	Development and long-term place value	Development and recurring income

Choosing How TANRISE Will Be Known in Its Next Chapter.

Dimension	Option 01	Option 02	Option 03
Complexity	Lower	Moderate	Higher

All options should accommodate TANRISE’s five business pillars and its existing and future portfolio.

All retain CINTA and Super-Serving as foundations.

Preliminary recommendation: Adopt Option 02 as the corporate brand direction and incorporate Option 03’s economic ambition into the business strategy.

The Trusted Developer

Strategic territory Development excellence.

Brand idea Building Tomorrow’s Places.

Supporting statement Creating developments that inspire confidence today and opportunity for tomorrow.

Brand purpose To create well-conceived places that support progress, opportunity, and a better future for the people and businesses they serve.

Brand vision To become one of Indonesia’s leading and most trusted property developers, recognised for thoughtful concepts, dependable delivery, enduring quality, and lasting value.

Brand mission To develop residential, commercial, industrial, hospitality, and integrated destinations through thoughtful planning, responsible execution, and a commitment to the customers, partners, and communities who depend on the places we create.

The Trusted Developer

Brand positioning TANRISE is a trusted Indonesian property developer combining market understanding, relevant concepts, and dependable execution to create places that support life and business.

Brand essence Progress Through Purposeful Development.

Brand promise Well-conceived places. Responsibly delivered.

Brand personality Professional, visionary, dependable, disciplined, thoughtful, and approachable.

Tone of voice Clear, assured, knowledgeable, responsible, and optimistic.

Corporate belief Great development begins with understanding what tomorrow will require and delivering responsibly today.

Culture Commitment-led execution, accountability, delivery ownership, and continuous improvement.

The Trusted Developer

Brand values Customer Focus, Integrity, Teamwork, and Agility.

Strategic strength Clear and credible, with relatively limited change to the existing operating model.

Strategic limitation May be insufficiently differentiated from established property developers.

The Purposeful Place-Maker

Strategic territory Human-centred placemaking.

Status Recommended direction.

Brand idea Elevating Life.

Supporting statement Creating purposeful places where people flourish, businesses thrive, and communities grow.

Brand purpose To enrich people’s lives and create opportunities for businesses and communities through places designed with purpose, care, and lasting relevance.

Brand vision To be one of Indonesia’s leading and most trusted property developers, creating purposeful places that elevate everyday life, enable business growth, and generate lasting value for generations.

Brand mission We develop and nurture places that respond to real human and business needs.

The Purposeful Place-Maker

Through thoughtful concepts, responsible development, meaningful partnerships, and continued care, we create environments where people feel they belong, businesses find opportunities, and communities can grow.

Brand positioning TANRISE is an Indonesian property developer creating purposeful places that bring together quality development, meaningful experiences, and long-term value for people, businesses, and communities.

Brand essence Purposeful Places. Meaningful Progress.

Brand promise Places created with purpose. Relationships built on trust.

Brand personality Thoughtful, warm, dependable, progressive, and ambitious.

Tone of voice Human, confident, sincere, inspiring, and professional.

The Purposeful Place-Maker

Corporate belief A place is more than what we build. Its true value is measured by the lives it supports, the opportunities it creates, and the positive impact it leaves behind.

Values and service foundation CINTA guides behaviour. Super-Serving translates care and trust into customer experience.

Strategic advantage Relevant across integrated cities, residential communities, business districts, industrial environments, and hospitality assets.

The Integrated Value Creator

Strategic territory Integrated value ecosystems.

Brand idea Creating Lasting Value.

Supporting statement Connecting places, people, and possibilities for generations of growth.

Brand purpose To unlock the long-term potential of places by connecting people, businesses, and opportunities through integrated development and responsible stewardship.

Brand vision To become a leading Indonesian property and asset-value creation company, recognised for sustainable growth, thriving communities, and enduring economic value.

Brand mission We develop, activate, and manage places that bring together complementary uses, partnerships, and experiences.

The Integrated Value Creator

By combining development expertise with long-term asset management and commercial innovation, we create value that continues beyond project completion.

Brand positioning TANRISE is an integrated property developer focused on creating lasting value through purposeful developments, connected business ecosystems, and long-term asset performance.

Brand essence Connected Growth. Enduring Value.

Brand promise We create places that continue to grow in value and purpose.

Brand personality Visionary, enterprising, collaborative, disciplined, and resilient.

Tone of voice Strategic, confident, intelligent, optimistic, and accountable.

The Integrated Value Creator

Corporate belief The greatest value of a development is realised through the opportunities and relationships it continues to create.

Values and service foundation CINTA guides collaboration, integrity, customer understanding, and adaptability. Super-Serving supports continuing relationships.

Strategic limitation Requires substantial evidence of operating capabilities, capital discipline, asset performance, and recurring-income contribution.

05

Recommended corporate brand platform

Elevating Life. Creating Lasting Value.

One Human Promise. One Commercial Discipline.

Elevating Life The purpose and value people experience.

Creating Lasting Value The commercial responsibility and long-term ambition.

Retain Elevating Life as the primary corporate brand expression.

Use Creating Lasting Value as a supporting strategic proposition connecting the human promise to business performance.

RECOMMENDED POSITIONING STATEMENT

TANRISE is a trusted Indonesian property developer creating purposeful places that enrich lives, enable businesses, and strengthen communities through thoughtful development, meaningful partnerships, and long-term stewardship.

Portfolio Application

The promise should be expressed differently across a home, township, office, warehouse, industrial park, hotel, or leisure destination while remaining recognisably TANRISE.

Everything Begins With Purpose.

Brand component	Recommended direction
Purpose	Enrich lives and create opportunities through purposeful places
Vision	Become a leading and trusted Indonesian property developer, elevating life and creating lasting value
Mission	Develop and nurture places that serve real needs through thoughtful concepts, responsible delivery, and continued care
Brand essence	Purposeful Places. Meaningful Progress.
Brand promise	Places created with purpose. Relationships built on trust.

Everything Begins With Purpose.

Brand component	Recommended direction
Brand positioning	A human-centred developer combining purposeful development with long-term place value
Brand personality	Thoughtful, dependable, progressive, warm, and ambitious
Service philosophy	Super-Serving
Core competencies	CINTA
Corporate expression	Elevating Life

> Scope: The platform applies across TANRISE’s five business pillars without replacing established destination, project, or hotel brands.

Build on the Existing Foundation. Define the Next Chapter.

EXISTING CLIENT VISION

To be the leading and trusted property developer delivering the best concepts.

EXISTING CLIENT MISSION

To develop properties providing added value for clients and business partners.

PROPOSED EVOLVED VISION

To be one of Indonesia’s leading and most trusted property developers, creating purposeful places that elevate lives, empower businesses, and generate lasting value for generations.

PROPOSED EVOLVED MISSION

We develop and nurture places that bring people, businesses, and communities closer to what matters.

Build on the Existing Foundation. Define the Next Chapter.

Through thoughtful concepts, responsible development, meaningful partnerships, and continued care, we create environments where life can flourish, opportunities can grow, and value can endure.

> Strategic interpretation: The existing vision and mission remain the client’s documented foundation. The evolved statements are recommendations for leadership approval.

The Top Five ambition is a measurable corporate objective within the broader vision.

Values Must Be Experienced Across Every Project.

Retain Customer Focus, Integrity, Teamwork, and Agility, consistent with the current official TANCORP CINTA description.

Value	What we believe	What it means in practice
Customer Focus	Every place begins with people	Understand homeowners, tenants, occupiers, visitors, guests, and partners
Integrity	Trust is earned through actions	Communicate accurate names, status, ownership relationships, and commitments
Teamwork	Great places require collective effort	Coordinate development, finance, sales, asset management, operators, and partners

Values Must Be Experienced Across Every Project.

Value	What we believe	What it means in practice
Agility	Progress requires adaptability	Respond to market conditions and improve through customer and operating evidence

CULTURE STATEMENT

We listen before we build. We deliver what we promise. We grow together. We adapt to create better outcomes.

Portfolio application: Apply shared values through asset-specific behaviours rather than identical service procedures everywhere.

We Take Responsibility for Places.

Translate CINTA into five daily practices.

- 1. Understand Before We Create Ground decisions in customer, market, site, and operating requirements.
- 2. Own Every Commitment Assign each promise a responsible owner, timeline, and measurable outcome.
- 3. Work Beyond Silos Connect development, sales, finance, operations, customer service, and external operators.
- 4. Care Beyond Completion Treat handover and opening as the beginning of a continuing relationship.
- 5. Improve With Evidence Use customer feedback, project outcomes, asset performance, and operational data to improve decisions.

Cultural Commitment

Every decision we make, every place we create, and every relationship we build should reflect the care, responsibility, and ambition of TANRISE.

Implementation recommendation: Embed these behaviours in leadership reviews, project governance, onboarding, partner coordination, and customer experience standards.

Professional in Our Expertise. Human in Our Approach.

Personality	Meaning	Expression
Thoughtful	Understand before creating	Relevant concepts, purposeful planning, attention to detail
Dependable	Honour commitments	Accurate communication, responsible delivery, consistent service
Progressive	Embrace better possibilities	Innovation, adaptability, forward-looking development
Warm	Care about human experiences	Empathy, approachable communication, community relationships
Ambitious	Strive for meaningful growth	High standards, commercial discipline, continuous improvement

Brand Character

TANRISE is the thoughtful visionary: a capable and trusted developer who understands that creating a place means taking responsibility for the people and businesses who depend on it.

Avoid: Arrogance, excessive luxury language, impersonal communication, unnecessary technical complexity, and unsupported claims.

Portfolio application: A logistics occupier, apartment buyer, township resident, and hotel investor should recognise the same corporate character through different relevant experiences.

Speak With Confidence. Connect With Humanity.

Principle	Conventional language	Proposed TANRISE language
Human-centred	Premium residential development with comprehensive facilities	A neighbourhood designed around the everyday moments that matter
Purposeful	Strategically located commercial properties	Business spaces that bring people closer to opportunity
Trustworthy	World-class quality guaranteed	Thoughtfully planned, clearly communicated, and responsibly delivered
Progressive	Innovative integrated development	Connecting homes, businesses, and experiences to create new possibilities

Speak With Confidence. Connect With Humanity.

Principle	Conventional language	Proposed TANRISE language
Warm	Providing exceptional customer service	Here to support you, from your first visit to the years that follow

CORPORATE VOICE

Confident, without boasting. Inspiring, without exaggeration. Warm and professional. Ambitious and grounded in evidence.

SUGGESTED CORPORATE NARRATIVE

Every place begins with a possibility.

A place to call home. A space to grow a business. A destination to discover something new.

Speak With Confidence. Connect With Humanity.

At TANRISE, we believe thoughtful development can transform these possibilities into meaningful experiences.

Because what we build matters. What people can achieve within it matters even more.

TANRISE. Elevating Life.

> Communication rule: Clearly label existing facilities, ongoing works, future developments, and proposed concepts.

Trust Is What People Experience.

Listen › Design › Deliver › Care › Improve

Stage	Customer commitment	Proposed measurement
Listen	Understand real needs	Research completion and customer insight
Design	Create relevant, useful concepts	Concept validation and feasibility approval
Deliver	Communicate and fulfil commitments	Timeliness, quality, and readiness
Care	Support continuing relationships	Resolution time, satisfaction, and retention

Trust Is What People Experience.

Stage	Customer commitment	Proposed measurement
Improve	Learn from feedback and performance	Recurring-issue reduction and completed improvements

APPLY THE PHILOSOPHY BY ASSET TYPE

- Integrated City: Infrastructure, public realm, resident communication, and destination coordination.
- Community Living: Purchase, construction updates, handover, defects, and after-sales care.
- Business Districts: Tenant onboarding, access, maintenance, and commercial support.
- Logistic & Industrial Park: Occupier readiness, infrastructure reliability, and operating support.
- Hotel, MICE, and Leisure: Guest experience and asset performance coordinated with the relevant operator.

Trust Is What People Experience.

Recommendation: Establish shared customer-experience principles with clear responsibilities between TANRISE, subsidiaries, estate managers, TANLY, and other partners.

06

Business transformation strategy

Strengthen Existing Income Engines. Develop Additional Sources Selectively.

TANRISE already reports development and recurring-income activities.

DOCUMENTED INCOME CATEGORIES

DEVELOPMENT

- Apartments and condotels.
- Warehouses and shophouses.
- Houses and townhouses.
- Land.

RECURRING

- Hotel operations.

Strengthen Existing Income Engines. Develop Additional Sources Selectively.

- Rental of warehouses and shophouses.

PROPOSED EXPANSION OF VALUE CREATION

Value engine	Potential activities
Development	Continue relevant property development and sales
Asset Income	Improve leasing, retained commercial assets, and selected hospitality investments
Operations & Services	Evaluate estate management, facilities, destination operations, and suitable memberships
Partnerships	Use joint ventures, anchor tenants, institutional partnerships, and management arrangements

Strengthen Existing Income Engines. Develop Additional Sources Selectively.

Examples include the commercial portfolio, retained hospitality assets, Taman Dayu leisure components, and selected industrial developments.

> Strategic principle: Choose ownership and operating arrangements according to risk, return, capital requirements, and capability.

> Important: Proposed fees, memberships, and service businesses require feasibility assessment before being presented as established material income streams.

One Corporate Strategy. Asset-Specific Growth Engines.

Business pillar	Portfolio application	Strategic priority
Integrated City	Taman Dayu; Bandung; City Sidoarjo; Swiss of Taman Dayu	Coordinate masterplanning, infrastructure, phasing, anchors, and long-term place value
Community Living	Kyo Society; Grand Sunrise Menganti; Sidoarjo and Malang residential projects; ARC100 portfolio reference	Match products to demand, clarify naming, improve absorption, delivery, and customer care
Business Districts	Voza Tower; Rame-Rame; Grand Central Bandung; Midpoint Kayoon; Bali Bites	Improve commercial relevance, occupancy, tenant mix, visitation, and asset utilisation

One Corporate Strategy. Asset-Specific Growth Engines.

Business pillar	Portfolio application	Strategic priority
Logistic & Industrial Park	Existing Tritan assets; Gresik; Gempol; Palembang; Banjarbaru	Deliver suitable infrastructure, occupier readiness, connectivity, and phased development
Hotel, MICE, and Leisure	VASA; Cleo; Solaris; golf; Driving Range; hospitality pipeline	Improve operating performance and coordinate investment with management capability

KPI PRINCIPLE

Each pillar needs its own commercial measures, supported by a consolidated corporate scorecard.

Distinguish:

- Development sales and recognised revenue.

One Corporate Strategy. Asset-Specific Growth Engines.

Operating income and cash flow.

Utilisation and customer demand.

Capital employed and investment returns.

Customer and partner experience.

Use the Existing Portfolio and Pipeline to Demonstrate the Strategy.

- 1. Taman Dayu — Sport, Leisure, and Destination Value

Coordinate Tanrise Taman Dayu Pandaan, Golf Taman Dayu, the Driving Range, and the Swiss of Taman Dayu Pandaan development.

Evaluate additional wellness, community, hospitality, and F&B programming.

Business hypothesis: More relevant activities and repeat visitation could support operating income and surrounding property demand.

Measures: Visitation, repeat participation, asset utilisation, operating profit, and property enquiries.

- 2. Integrated-City Growth — Sidoarjo and Bandung

Develop Tanrise City Sidoarjo and Tanrise Bandung through commercially sustainable phases.

Use the Existing Portfolio and Pipeline to Demonstrate the Strategy.

For Bandung, coordinate the wider destination with Grand Central Bandung and residential development.

Business hypothesis: Appropriate anchors, infrastructure, and visible delivery could improve buyer confidence and early-phase attractiveness.

- 3. Industrial and Logistics — Occupier Productivity

Use Tritan Gresik, Tritan Gempol Pasuruan, Tanrise Industrial Park Palembang, and Tanrise Industrial Park Banjarbaru to test a consistent occupier proposition.

Business hypothesis: Technical suitability, infrastructure reliability, and coordinated services could strengthen acquisition and retention.

Supporting Workstream — Hospitality Investment and Operations

Align the VASA and Solaris pipeline with operating feasibility, management agreements, opening readiness, and capital discipline.

Recommendation: Advance each initiative through a documented business case before scaling the model.

Measure Growth by Value Created.

Evaluate developments and retained-asset initiatives through a common framework.

Criterion	Core question
Market demand	Is there sufficient evidence of demand?
Strategic fit	Does the investment support the portfolio strategy?
Capital efficiency	What return is generated relative to investment?
Cash-flow resilience	How exposed is the project to market cycles and timing?
Recurring-income potential	Can the asset produce sustainable continuing earnings?
Operating capability	Can TANRISE or a qualified partner operate it effectively?

Measure Growth by Value Created.

Criterion	Core question
Ownership economics	What share of cash flow and earnings is attributable to TANRISE?
Brand contribution	Will the investment strengthen trust and corporate reputation?

FINANCIAL DISCIPLINES

Project IRR · NPV · ROIC · Cash Conversion · Leverage · Operating Margin · Sensitivity Analysis

PIPELINE APPLICATION

Apply consistent evaluation to integrated cities, residential phases, commercial assets, industrial parks, warehouses, hotels, and leisure developments.

Measure Growth by Value Created.

Management decision: Establish an investment committee process with asset-specific assumptions and clearly accountable sponsors.

07

The roadmap to 2035

Four Phases. One Ambition Through 2035.

PERIOD / PHASE / PRIORITIES

2026–2027	2028–2029	2030–2032	2033–2035
Foundation	**Activation**	**Acceleration**	**Leadership**
Reconcile the portfolio register; confirm naming and ownership; establish financial and operating baselines; review current pipeline commitments	Strengthen commercial and operating capabilities; deliver approved development phases; improve performance of retained assets	Scale validated models, productive assets, and effective partnerships across the five pillars	Optimise the portfolio, strengthen earnings resilience, and compete against the agreed Top Five benchmarks

Immediate Portfolio Focus

- Integrated-city phasing in Bandung, Sidoarjo, and Taman Dayu.
- Community Living product and naming clarity.
- Commercial asset productivity.
- Industrial and logistics readiness.
- Hospitality development and opening discipline.

> Strategic principle: Measure financial, operational, and organisational progress throughout the journey.

The roadmap is a proposed corporate transformation framework, not a replacement for individual project schedules.

Measure the Ambition. Manage the Journey.

Dimension	Proposed KPI	Objective
Financial scale	Consolidated revenue	Top Five among the agreed listed-property peer group
Profitability	Net profit attributable to owners of the parent	Top Five among the agreed peer group
Capital productivity	ROIC and project IRR	Meet board-approved hurdles
Financial resilience	Debt, liquidity, and cash conversion	Sustainable funding and leverage
Recurring income	Revenue, operating profit, and cash contribution	Meaningful, growing contribution

Measure the Ambition. Manage the Journey.

Dimension	Proposed KPI	Objective
Development execution	Absorption, handover, project margin, and delivery milestones	Consistent execution
Asset productivity	Occupancy, RevPAR, NOI, utilisation, and visitation	Improve against asset-specific benchmarks
Customer confidence	Satisfaction, complaints, handover quality, and retention	Measurable improvement
Brand strength	Awareness, trust, and endorsement recognition	Stronger corporate reputation

Measure the Ambition. Manage the Journey.

Dimension	Proposed KPI	Objective
Portfolio governance	Approved names, status, ownership, and operator records	One reconciled portfolio register

FINANCIAL PLANNING REQUIREMENT

Build an integrated model covering the contribution and funding requirements of:

- Existing assets.
- Ongoing developments.
- Upcoming projects.
- Retained commercial and hospitality assets.

Measure the Ambition. Manage the Journey.

Partnerships and potential acquisitions.

Downside scenarios.

Projected competitor thresholds.

Scale challenge: The FY2025 revenue baseline of approximately Rp410.7 billion requires substantial growth; competitors may also expand.

Turn Portfolio Clarity Into Executive Decisions.

Period	Priority action	Deliverable
Days 1–30	Reconcile all projects, names, statuses, ownership interests, and management relationships	Approved master portfolio register
Days 1–45	Audit financial and operating performance	Profitability, capital, cash-flow, and productivity baseline
Days 30–60	Approve corporate brand platform and naming governance	Brand strategy and endorsement framework
Days 30–90	Review existing commitments and prioritise the pipeline	Investment and transformation opportunity matrix

Turn Portfolio Clarity Into Executive Decisions.

Period	Priority action	Deliverable
Days 60–120	Develop priority business cases	Taman Dayu, integrated-city, industrial, and hospitality workstreams
Days 90–150	Establish customer and operating standards	Super-Serving measures and partner responsibilities
Days 120–180	Approve the funded transformation plan	Roadmap, accountable owners, and quarterly scorecard

GOVERNANCE

Create an executive-led steering committee representing finance, development, commercial, operations, corporate strategy, and relevant operating partners.

Turn Portfolio Clarity Into Executive Decisions.

Rubicube can support strategy, brand governance, concept development, and communication architecture.

Investment and operating decisions remain with TANRISE management and qualified delivery partners.

CLOSING STATEMENT

We Build Places. We Create Possibilities. We Elevate Life.

The future of TANRISE will be shaped by the lives we enrich, the businesses we enable, the communities we strengthen, and the lasting value we create.

TANRISE — Elevating Life.

A

Complete Project And Naming Register

Integrated City

Project	Status in client materials	Naming and interpretation
Tanrise Taman Dayu Pandaan	Existing	Integrated destination; distinguish it from golf, resort, Driving Range, and other components
Tanrise Bandung	Ongoing	Integrated development in Bandung
Tanrise City Sidoarjo	Ongoing	Integrated-city development in Sidoarjo
Swiss of Taman Dayu Pandaan	Ongoing	Separate development reference within the wider Taman Dayu context
Tanrise Taman Dayu / Taman Dayu	Brand and destination references	Use the approved full destination name consistently

Integrated City

Project	Status in client materials	Naming and interpretation
Tanrise City Sidoarjo logo treatment	Brand portfolio proposal	Naming exists in investor materials; final visual lockup requires approval

> Rule: Do not merge the wider Taman Dayu destination and its component assets into a single undifferentiated investment.

Community Living and High-Rise Residential

Project or name	Status or evidence	Treatment
Grand Sunrise Menganti	Existing in investor deck	Retain
Grand Sunrise	Established brand reference	Use location descriptor where approved
Jumana Residence	Existing public-facing name and investor milestone	Retain as a recognised name during transition
Sunrise Residence Sidoarjo	Existing listing in investor deck; proposed replacement for Jumana in brand deck	Record as one project with a naming transition
Kyo Society	Existing	Residential apartment project

Community Living and High-Rise Residential

Project or name	Status or evidence	Treatment
Kyo Apartment	Descriptive label in branding deck	Do not count separately from Kyo Society
ARC100 / ARC 100	Documented apartment brand and investor milestones	Use consistent approved styling; confirm relationship to other accommodation names
Sunrise Residence Malang	Ongoing in investor deck	Confirm final name and scope
Sunrise Garden Malang	Name used on investor portfolio map	Reconcile with other Malang references
Grand Sunrise Malang	Shown in proposed naming and project rendering	Confirm whether separate from, or a naming alternative to, Sunrise Residence Malang

Community Living and High-Rise Residential

Project or name	Status or evidence	Treatment
Aegis Avenue	Historical launch reference in investor milestones	Retain in historical register; confirm current name, classification, and relationship to other projects

> Critical rule: Jumana Residence and Sunrise Residence Sidoarjo should not be counted as two separate projects without evidence of distinct assets.

Malang rule: Do not assume that every Malang name represents a separate development.

Business Districts, Commercial, and Retail

Project	Status or evidence	Treatment
Voza Tower	Existing	Office development
Rame-Rame	Existing listing; 2026 launch year shown	Commercial destination with stalls, sportainment, and cinema components
Grand Central Bandung	Ongoing	Commercial development associated with the Bandung site
Midpoint Kayoon	Included in brand portfolio deck	Commercial project; confirm current completion and operating status
Bali Bites	Existing listing in investor portfolio map and brand deck	Commercial/F&B destination

Business Districts, Commercial, and Retail

Project	Status or evidence	Treatment
Temu Kamu	Named within the Bali Bites reference	F&B operating concept; distinguish from the property asset
Chamas	Named within the Bali Bites reference	F&B operating concept; distinguish from the property asset
Kyo Society under Commercial & Retail	Classification used in branding deck	Explain investment marketing separately; retain primary residential-apartment classification

Commercial-component rule: Shophouses and retail areas within housing, warehouse, or township projects are components of those developments unless documented as separate brands or assets.

Logistics and Warehouse Portfolio

Project or brand	Status in client materials	Treatment
Tritan Surabaya	Existing	Retain approved location naming
Tritan Medan	Existing	Warehouse development; do not automatically rename as an industrial park
Tritan Wedi 1 — Sidoarjo	Existing	Retain
Tritan Wedi 2 — Sidoarjo	Existing	Retain
Tritan Taman — Sidoarjo	Existing	Retain

Logistics and Warehouse Portfolio

Project or brand	Status in client materials	Treatment
Tritan Southgate / South Gate	Existing and historical references	Standardise approved spelling
Tritan Banyu Urip	Historical development reference	Confirm relationship to current Surabaya naming before counting separately
Tritan Point Bandung	Historical warehouse reference	Distinguish from the newer Tanrise Bandung integrated development
Tritan Gresik	Ongoing	Confirm latest delivery status
Tritan Gempol Pasuruan	Ongoing	Confirm location record and latest delivery status

Logistics and Warehouse Portfolio

Project or brand	Status in client materials	Treatment
TritanPoint / Tritan Point	Existing brand reference	Record alongside proposed naming transition
TritanHub / Tritan Hub	Existing brand reference and milestones	Record alongside proposed naming transition
TRITAN + Location	Proposed consolidated naming system	Do not describe as fully implemented without approval
Tritan Kediri	Shown in proposed brand architecture	Project scope and operating/development status require confirmation

> Rule: Location-based naming proposals do not, by themselves, establish that each location is an operating project.

Industrial Parks

Project	Status in client materials	Naming and interpretation
TREATMENT		
Tanrise Industrial Park Palembang	**Ongoing**	**Confirm development area definitions and current milestone status**
Tanrise Industrial Park Banjarbaru	Ongoing	Use Banjarbaru consistently; abbreviated “Banjar” references should be reconciled
Tanrise Industrial Park Medan	Shown in proposed branding deck	Confirm whether this is a separate project, future plan, or proposed naming treatment

> Rule: Keep Tritan Medan and Tanrise Industrial Park Medan distinct in the register until their relationship is established.

Existing Hospitality and Leisure References

Property or asset	Naming in client materials	Treatment
Vasa Hotel Surabaya	VASA, HR Muhammad — Surabaya	Existing hotel reference
Vasa Suite Surabaya	VASA, Gubeng — Surabaya	Existing accommodation reference; standardise Suite/Suites styling
Cleo Business Hotel Basuki Rahmat	Investor portfolio and milestones	Existing hotel reference
Cleo Business Hotel Walikota Mustajab	Investor portfolio and milestones	Existing hotel reference

Existing Hospitality and Leisure References

Property or asset	Naming in client materials	Treatment
Cleo Business Hotel Jemursari	Investor portfolio and milestones	Existing hotel reference
Solaris Hotel Kuta Bali	Investor portfolio	Existing hotel reference
Solaris Hotel Malang	Historical and portfolio references	Existing hotel reference
Solaris Villa Bali / Villa Solaris Bali	Investor portfolio and milestones	Existing listing; use approved styling
Solaris Villa Malang / Solaris Villa Extension Malang	Investor portfolio and milestones	Existing listing; identify the villa extension separately from the hotel

Existing Hospitality and Leisure References

Property or asset	Naming in client materials	Treatment
Golf Taman Dayu	Investor asset schedule	Golf asset
Driving Range	Investor asset schedule	Separate leisure asset within the Taman Dayu context
Taman Dayu Golf & Resort	TANLY operating/destination name	Map its relationship to the underlying property assets and operating arrangements

> Rule: A hotel brand, legal owner, developer, and management company may occupy different levels of the architecture.

TANRISE Hospitality Development Pipeline

Project	Status in investor deck	Treatment
VASA Ubud	Ongoing	Vasa Resort Ubud naming also appears publicly; confirm final approved name
VASA Bromo	Ongoing	Vasa Hotel/Resort Bromo styling should be standardised
VASA Canggu	Upcoming	Do not present as operating
VASA Malang	Upcoming	Distinguish from Solaris Malang and other Malang developments
GOED Malang	Upcoming	Separate brand/project entry within the Malang development context

TANRISE Hospitality Development Pipeline

Ownership figures for Ubud and Bromo conflict between the summary and detailed pages. Do not reproduce a single percentage without reconciliation.

Wider TANLY Pipeline — Separate From Confirmed TANRISE Asset Ownership

TANLY’s publicly listed future collection also includes:

- Vasa Hotel Manado.
- Vasa Hotel Benoa.
- Vasa Hotel Nilaya, Batu.
- GOED President Pacitan.

These are wider hospitality-management portfolio references.

Do not add them to TANRISE’s owned or invested asset list unless the client confirms the relevant property interest.

Public hotel naming also differs from some investor-deck labels. Maintain an alias field rather than creating duplicate project entries.

B

Naming, Classification, And Data Reconciliation

Naming and Classification Decisions

Issue	Required decision
Jumana → Sunrise Residence Sidoarjo	Confirm whether the change is approved and implemented
Grand Sunrise Malang / Sunrise Residence Malang / Sunrise Garden Malang	Confirm number of projects, approved names, and scopes
TritanPoint / TritanHub → TRITAN	Confirm implementation and location mapping
Kyo Society classified under Commercial	Agree primary classification and explain the investment proposition separately

Naming and Classification Decisions

Issue	Required decision
ARC100 and accommodation references	Confirm current brand, asset, and operating relationships
Midpoint Kayoon	Confirm current project status and commercial model
Bali Bites	Clarify asset ownership, destination identity, and restaurant-management relationships
The House of VASA	Confirm whether this is an approved architecture or an unapproved proposal
Education and Healthcare	Identify any committed facilities or operating businesses before presenting them as established units

Naming and Classification Decisions

Issue	Required decision
Five business pillars versus seven product categories	Approve one reporting hierarchy and a clear cross-reference

Internal Numerical Conflicts in the Investor Deck

Item	Conflicting information
VASA Ubud ownership	Summary: 100%; detailed project page: 73.3%
VASA Bromo ownership	Summary: 73.3%; detailed project page: 100%
Swiss of Taman Dayu ownership	Summary: 45.0%; detailed page: 45.5%
Palembang industrial-park area	Table: 131.1 hectares; rendering caption: 212 hectares
Tritan Gempol location	Project name/map: Pasuruan; detailed table: Sidoarjo
Rounded versus detailed ownership figures	Several summary percentages differ slightly from detailed legal-interest figures

Internal Numerical Conflicts in the Investor Deck

Differences may reflect rounding, effective ownership, legal ownership, development phases, or errors. The decks do not provide sufficient reconciliation.

> Presentation rule: Omit disputed percentages and areas from the leadership narrative until clarified.

C

Financial Validation Workstream

Financial Validation Workstream

TANRISE 2035 FINANCIAL GAP ANALYSIS AND GROWTH SCENARIOS

Establish:

- 1. Current audited revenue, attributable profit, assets, debt, and operating cash flow.
- 2. Consistent peer revenue and attributable-profit rankings.
- 3. Projected 2035 thresholds under different competitor-growth assumptions.
- 4. Contributions required from the five business pillars.
- 5. Revenue and cash-flow timing from existing, ongoing, and upcoming projects.
- 6. Ownership-adjusted earnings contribution.
- 7. Capital investment and funding requirements.

Financial Validation Workstream

- 8. Contributions from partnerships and potential acquisitions.
- 9. Annual milestones and downside scenarios.

Recommended deliverable: TANRISE 2035 Financial Gap Analysis & Growth Scenarios.

Use audited financial statements as the primary financial baseline and reconcile differences with presentation summaries.

D

Turning Strategy Into Business Cases

Turning Strategy Into Business Cases

EVERY INITIATIVE SHOULD ANSWER THREE QUESTIONS

- 1. What Opportunity Are We Pursuing?

Examples:

- Improve Taman Dayu destination utilisation.
- Strengthen early-phase demand in Sidoarjo and Bandung.
- Improve industrial occupier acquisition.
- Increase productivity of retained commercial and hospitality assets.
- 2. What Capabilities Are Required?
- Development and infrastructure delivery.

Turning Strategy Into Business Cases

- Commercial leasing and tenant curation.
- Destination programming.
- Partnerships.
- Customer and membership management.
- Asset management.
- Hospitality operations.
- Reliable portfolio and financial reporting.
- 3. How Will Success Be Measured?

Use appropriate measures for each asset:

Turning Strategy Into Business Cases

- Sales absorption and margin.
- Handover and opening readiness.
- Occupancy and retention.
- Visitation and repeat visits.
- RevPAR and operating profit.
- NOI and cash contribution.
- Customer satisfaction.
- Return on invested capital.

Turning Strategy Into Business Cases

> Rule: Every business case needs an accountable owner, investment envelope, milestones, assumptions, and review dates.

E

Executive Decisions Required

Executive Decisions Required

Decision	Proposed recommendation
Corporate positioning	Adopt Elevating Life as the primary corporate expression
Portfolio reporting	Use the five documented business pillars as the current business-description baseline
Naming governance	Preserve established names and implement only approved naming transitions
Group architecture	Distinguish TANRISE’s property role from TANLY’s hospitality-management role
Business model	Strengthen development performance and selectively improve recurring-income engines

Executive Decisions Required

Decision	Proposed recommendation
Strategic priorities	Advance Taman Dayu, integrated-city, industrial, and hospitality business cases according to feasibility
2035 transformation	Establish a funded roadmap with annual milestones and executive accountability

All recommendations require leadership approval.

F

Design And Source Guidance

Design And Source Guidance

PRESENTATION STRUCTURE

Section	Slides	Objective
Corporate research and diagnosis	01–07	Establish the business, portfolio, and growth challenge
Competitive intelligence	08–17	Identify relevant competitive mechanisms
Corporate and portfolio architecture	18–21	Clarify group roles, projects, naming, and status
Three brand alternatives	22–25	Present strategic choices
Recommended platform	26–33	Define identity, values, culture, and experience

Design And Source Guidance

Section	Slides	Objective
Business transformation	34–37	Connect the portfolio to commercial value
Roadmap and execution	38–40	Translate ambition into action

VISUAL DIRECTION

Portfolio research Use actual client project photography and renderings. Label renderings and future facilities clearly.

Architecture Separate corporate group relationships, business pillars, destination brands, individual projects, and operators.

Project status Use a consistent visual key for existing, ongoing, upcoming, proposed naming, and unresolved information.

Design And Source Guidance

Financial comparisons Use consistent periods, definitions, and units. Show disputed or unreconciled figures only in the validation appendix.

Brand options Maintain one presentation system while giving each strategic option a distinctive emphasis.

Roadmap Distinguish the proposed corporate roadmap from individual project schedules.

PRIMARY CLIENT SOURCES

Client Source 1 RISE Investor Presentation — 1Q26 Result, dated 20 July 2026.

Key references: corporate vision and mission; development milestones; company structure; five business pillars; project portfolio; existing assets; ongoing and upcoming developments.

Client Source 2 Tanrise Brand Portfolio Strategy 2026.

Design And Source Guidance

Key references: product categories; proposed residential naming; Jumana-to-Sunrise transition; location-based Grand Sunrise and TRITAN naming; industrial-park identities; commercial portfolio references.

CENTRAL LEADERSHIP MESSAGE

TANRISE already has a diversified asset base and a substantial development pipeline.

Its next chapter should connect these strengths through clearer portfolio governance, purposeful development, dependable delivery, effective operating partnerships, and disciplined investment.

TANRISE — Elevating Life.

RESEARCH

TANRISE Competitive Advantages Research

Ten Indonesian Developer Case Studies and Lessons for the 2035 Ambition

Research title

TANRISE: Learning from Indonesia’s Major Property Developers

Subtitle: Company origins, growth models, competitive advantages, financial scale, and implications for TANRISE’s Top Five ambition in 2035.

Research scope: Ten selected listed developers and their relevant group backgrounds.

Financial comparison: FY2025 full-year results.

Research reference date: 29 October 2026.

The ten companies being studied

Case	Correct company name	Ticker	Important distinction
1	PT Bumi Serpong Damai Tbk	BSDE	A listed company within Sinar Mas Land
2	PT Lippo Karawaci Tbk	LPKR	One listed platform within the broader Lippo Group
3	PT Ciputra Development Tbk	CTRA	The consolidated listed Ciputra development platform
4	PT Summarecon Agung Tbk	SMRA	The company intended by “Sinar Mas Agung”
5	PT Pakuwon Jati Tbk	PWON	The company intended by “Bakri Jati”

The ten companies being studied

Case	Correct company name	Ticker	Important distinction
6	PT Agung Podomoro Land Tbk	APLN	Distinguish the listed issuer from the longer-established group
7	PT Duta Pertiwi Tbk	DUTI	A listed subsidiary consolidated within BSDE
8	PT Alam Sutera Realty Tbk	ASRI	Integrated township and property developer
9	PT Jaya Real Property Tbk	JRPT	Part of Pembangunan Jaya Group

The ten companies being studied

Case	Correct company name	Ticker	Important distinction
10	PT Pantai Indah Kapuk Dua Tbk	PANI	A listed platform developing assets in the PIK2 area

> Key message: Case numbers are identifiers, not current market ranks.

How to interpret this research

THREE EVIDENCE CATEGORIES

- Reported fact: Information disclosed in company reports, financial statements, or official histories.
- Analyst assessment: An interpretation of how a business model creates advantages or exposes the company to risk.
- Proposed application: A recommendation for TANRISE that requires feasibility testing and management approval.

COMPARISON RULES

- Revenue, marketing sales, profit, and market capitalisation measure different things.
- Consolidated group results must not be added to subsidiary results.
- Total profit differs from profit attributable to the parent.

How to interpret this research

- Acquisitions, divestments, and handover timing can change apparent performance.
- FY2025 provides a common full-year baseline; it is not a substitute for all subsequent 2026 disclosures.

FY2025 revenue comparison within the selected cohort

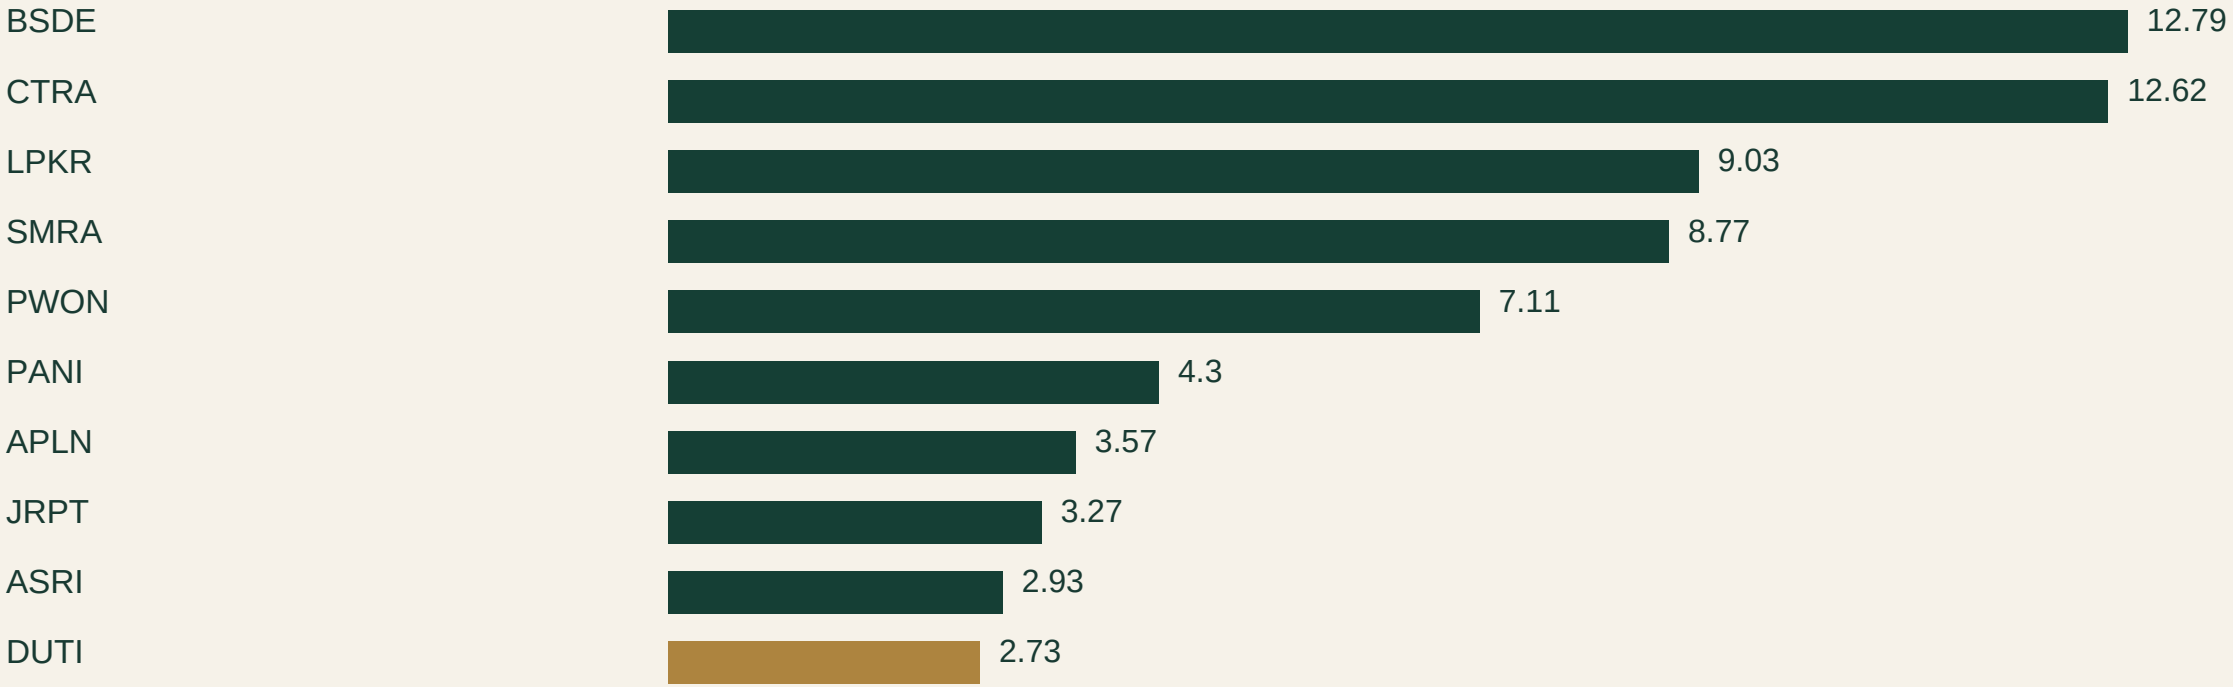

REPORTED CONSOLIDATED REVENUE, APPROXIMATELY RP TRILLION

> DUTI is included within BSDE consolidation. Do not sum the bars into a market total.

Sources: BSDE annual report, Ciputra reporting, LPKR results announcement, Summarecon presentation, Pakuwon annual report, PANI results, APLN annual report, JRPT results, ASRI annual report, DUTI annual report.

FY2025 revenue comparison within the selected cohort

FY2025 · Consolidated revenue, approximately Rp trillion · Selected cohort

DUTI is included within BSDE consolidation. Do not sum the bars into a market total.

Sources: BSDE annual report, Ciputra reporting, LPKR results announcement, Summarecon presentation, Pakuwon annual report, PANI results, APLN annual report, JRPT results, ASRI annual report, DUTI annual report.

Interpretation

This table describes the selected issuers. It does not establish Indonesia’s complete Top Ten.

LPKR also reports revenue after final tax of approximately Rp8.84 trillion; the table uses its headline revenue line. PANI is shown at the precision of its financial-results release.

Sources: BSDE annual report, Ciputra reporting, LPKR results announcement, Summarecon presentation, Pakuwon annual report, PANI results, APLN annual report, JRPT results, ASRI annual report, DUTI annual report.

BSDE: Company background and 5W1H

- Who: PT Bumi Serpong Damai Tbk, a listed township developer within Sinar Mas

Land.

- What: Residential, commercial, and supporting urban development, with BSD City as its flagship.
- Where: Its principal development identity is centred on the Serpong–Tangerang area, alongside a wider portfolio.
- When: Established in 1984; listed in 2008.
- Who is behind it: The Sinar Mas Land platform and the Widjaja business-family legacy. This group association should not be mistaken for a claim that one individual alone founded the original BSD venture.
- Why and how — analyst interpretation: Long-term control of development land enables infrastructure and amenities to increase the attractiveness of successive property releases.

Source: Official BSDE history.

BSDE: Milestones and strategic inflection points

Period	Milestone	Strategic significance
1984	Company established	Beginning of the development platform
1990s–20 00s	Residential development and supporting amenities	Building a functioning township over successive phases
2008	Stock-market listing	Access to public equity capital
2010	Acquisition of Duta Pertiwi and other property entities	Expansion through corporate consolidation
2010s	Additional retail and commercial anchors	More reasons to live, work, and visit

Sources: Official history, 2025 annual report.

BSDE: Milestones and strategic inflection points

Period	Milestone	Strategic significance
FY2025	Revenue approximately Rp12.79 trillion	Evidence of the scale reached by the consolidated platform

Analyst interpretation: Growth combined development over time with acquisitions; it was not solely organic sales growth inside one township.

Sources: Official history, 2025 annual report.

BSDE: How the growth model works

ANALYST ASSESSMENT

- 1. Secure a substantial development pipeline.
- 2. Provide infrastructure and credible delivery.
- 3. Introduce residential products for different buyer segments.
- 4. Attract commercial and institutional activity.
- 5. Use an increasingly functional location to support subsequent releases.
- 6. Reinvest proceeds into development capacity and future inventory.

Competitive advantage: The business can capture value across multiple development phases rather than relying on one completed building.

BSDE: How the growth model works

> Important qualification: Amenities consume capital before their benefits are fully realised. Land holdings alone do not create cash flow.

BSDE: Financial scale and its interpretation

FY2025 REPORTED RESULTS, ROUNDED

- Revenue: Rp12.79 trillion
- Profit attributable to owners: Rp2.55 trillion
- FY2024 revenue: approximately Rp13.80 trillion
- FY2024 attributable profit: approximately Rp4.36 trillion

WHAT THIS TELLS US

BSDE has substantial revenue and earnings capacity, but scale does not remove volatility. FY2025 revenue and attributable profit were lower than FY2024.

Source: BSDE 2025 annual report — financial highlights.

What this does not prove

The figures do not establish that every project is equally profitable or that reported profit converts immediately into unrestricted cash.

Source: BSDE 2025 annual report — financial highlights.

BSDE: SWOT

ANALYST ASSESSMENT

STRENGTHS

- Established township platform and group capabilities
- Multiple property products and development phases
- Ability to coordinate land use and amenities

WEAKNESSES / STRUCTURAL CONSTRAINTS

- Substantial infrastructure and land capital requirements
- Handover and transaction timing affect annual results
- Large developments require sustained organisational coordination

OPPORTUNITIES

- Additional employment, education, and commercial activity
- More productive use of existing infrastructure
- Partnerships that broaden destination functions

THREATS

- Mortgage affordability and weaker purchasing power
- Competing township supply
- Construction-cost, infrastructure, and environmental risks

BSDE: Lessons for TANRISE

PROPOSED APPLICATIONS

- Give each integrated development a phased economic plan, not only a masterplan image.
- Connect residential releases to credible access, services, and employment demand.
- Assess anchors by their contribution to occupancy and sales, alongside their standalone economics.
- Maintain a rolling land and launch pipeline.
- Evaluate acquisitions separately from organic operating performance.

> Avoid copying prematurely: The scale of BSD’s infrastructure expenditure or the breadth of its portfolio.

> First test: Prepare one TANRISE project’s ten-year land, infrastructure, launch, collection, and funding schedule.

Lippo Karawaci: Company background and 5W1H

- Who: PT Lippo Karawaci Tbk, a listed property platform associated with the broader Lippo Group.
- What: Property development and asset-related businesses, with a portfolio shaped by major corporate transactions.
- Where: Established township markets include Lippo Village and Lippo Cikarang, alongside other locations.
- When: Incorporated in 1990 under its original corporate name.
- Who is behind it: The Lippo business-group legacy associated with Mochtar Riady; issuer management and ownership must be distinguished from the broader family group.
- Why and how — analyst interpretation: Build residential demand through integrated urban services, then adapt product and capital allocation as market conditions change.

Sources: Official corporate disclosure, annual reports.

Lippo Karawaci: Growth and portfolio reset

MILESTONE SEQUENCE

- 1990: Incorporation of the issuer’s predecessor.
- Subsequent decades: Expansion of township and associated urban-service businesses.
- Diversification period: Healthcare became an important part of the historical consolidated portfolio.
- 2024: Siloam-related divestment and deconsolidation changed the earnings and revenue comparison.
- 2025–2026: Greater emphasis on property execution, capital discipline, and portfolio optimisation.
- May 2026: Indra Yuwana appointed President Director.

Analyst interpretation: Lippo is a case study in both ecosystem development and the need to simplify or reset a complex portfolio.

Sources: Siloam transaction disclosure, 2026 AGM announcement.

Lippo Karawaci: How the growth model works

ANALYST ASSESSMENT

The historical model sought to make large residential locations more attractive by combining housing with supporting urban functions.

The operating challenge is to match three things:

- Products that households can afford.
- Construction and handover capacity.
- Funding that remains available throughout development.

Competitive advantage: Existing township infrastructure and customer recognition can support repeat launches.

Lippo Karawaci: How the growth model works

Strategic tension: A broad ecosystem can increase demand, but owning too many different businesses can also increase capital requirements and management complexity.

Lippo Karawaci: Financial comparison requires adjustment

FY2025 REPORTED FIGURES, ROUNDED

- Headline revenue: Rp9.03 trillion
- Revenue after final tax: Rp8.84 trillion
- Profit attributable to owners: Rp470 billion

> Critical interpretation

FY2024 contained significant effects associated with the Siloam transaction. A simple profit-growth comparison would give a misleading picture of recurring property performance.

QUESTIONS TO EXAMINE SEPARATELY

- Continuing property revenue and margins.

Sources: Official results announcement, financial-report repository.

Lippo Karawaci: Financial comparison requires adjustment

- Cash collections and construction obligations.
- Financing expense and debt maturity.
- Disposal proceeds versus repeatable operating cash flow.

Sources: Official results announcement, financial-report repository.

Lippo Karawaci: SWOT

ANALYST ASSESSMENT

STRENGTHS

- Established township locations and market recognition
- Experience serving multiple residential segments
- Existing development infrastructure

WEAKNESSES / STRUCTURAL CONSTRAINTS

- Legacy portfolio complexity
- Financing costs can constrain operating flexibility
- Corporate transactions complicate performance assessment

OPPORTUNITIES

- More affordable, clearly segmented residential products
- Monetisation of underproductive assets
- Simpler portfolio and stronger cash discipline

THREATS

- Mortgage rejection, cancellations, and affordability pressure
- Competition from other suburban developers
- Refinancing, construction-cost, and execution risks

Lippo Karawaci: Lessons for TANRISE

PROPOSED APPLICATIONS

- Treat affordability as a complete household-payment equation.
- Track bookings, mortgage approvals, cancellations, collections, and handovers separately.
- Measure the capital and management burden of each additional business line.
- Distinguish asset-sale gains from repeatable development earnings.
- Use portfolio simplification when it releases capital for stronger growth engines.

> Avoid copying prematurely: Broad diversification justified only by the appeal of an “integrated ecosystem.”

> First test: Compare TANRISE’s planned residential products against household income, deposit capacity, bank approval, and monthly payments.

Ciputra: Company background and 5W1H

- Who: PT Ciputra Development Tbk.
- What: A development platform combining residential projects with selected commercial and recurring-income assets.
- Where: A geographically distributed Indonesian portfolio.
- When: Established in 1981; listed in 1994.
- Who is behind it: Founder Ir. Ciputra and the Ciputra business-family legacy; the listed company institutionalised the founder’s development approach.
- Why and how — analyst interpretation: Replicate a recognisable development capability across locations while adapting projects to local markets and partnerships.

Source: Ciputra annual report — company history and business model.

Ciputra: Company background and 5W1H

Core research question: How can a developer expand without purchasing and independently funding every land parcel?

Source: Ciputra annual report — company history and business model.

Ciputra: Milestones in building a repeatable platform

Period	Milestone
1981	Establishment of the original development company
1984	Early CitraGarden City development
1990s	Expansion of major residential and commercial projects
1994	Public listing
1997–1998 and aftermath	Crisis management and restructuring period
2017	Merger of Ciputra Surya and Ciputra Property into CTRA
FY2025	Reported revenue approximately Rp12.62 trillion

Sources: Historical results presentation, merger disclosure.

Ciputra: Milestones in building a repeatable platform

Analyst interpretation: The important transition was from founder-led projects to a repeatable, consolidated operating platform.

Sources: Historical results presentation, merger disclosure.

Ciputra: How the growth model works

ANALYST ASSESSMENT

Ciputra’s partnership approach is especially relevant to developers whose expansion is constrained by land acquisition and capital.

OPERATING LOGIC

- Combine development, branding, planning, and sales capabilities with access to local land.
- Adapt products and pricing to each city.
- Reuse operating knowledge across projects.
- Maintain central standards while allowing local commercial decisions.

Competitive advantage: Replication of capabilities across multiple markets.

Evidence reference: Ciputra annual report.

Ciputra: How the growth model works

Trade-off: Partnerships reduce some upfront burdens but create profit-sharing, governance, approval, and execution dependencies.

Evidence reference: Ciputra annual report.

Ciputra: Financial scale and operating momentum

FY2025 REPORTED FIGURES, ROUNDED

- Revenue: Rp12.62 trillion
- Reported net profit: Rp2.66 trillion
- Marketing sales: approximately Rp9.46 trillion
- FY2024 revenue: Rp11.19 trillion

INTERPRETATION

Revenue and marketing sales describe different stages of the business. FY2025 revenue can include handovers from sales made in earlier periods.

Competitive significance: A broad launch and handover pipeline supports scale, but geographical breadth requires strong controls and local execution.

Source: Ciputra 2025 sustainability report — financial and operational performance.

Ciputra: SWOT

ANALYST ASSESSMENT

STRENGTHS

- Replicable development capabilities and brand familiarity
- Partnership experience
- Geographic diversification

WEAKNESSES / STRUCTURAL CONSTRAINTS

- Managing many locations increases organisational complexity
- Shared economics and partner dependencies
- Local markets can behave differently

OPPORTUNITIES

- Selective expansion with suitable land partners
- New phases within established projects
- Better product adaptation and operating systems

THREATS

- Weak local demand despite national housing need
- Inconsistent execution across locations
- Land, approval, financing, and construction risks

Ciputra: Lessons for TANRISE

PROPOSED APPLICATIONS

- Build a formal land-partnership offer.
- Define what TANRISE contributes beyond its corporate name.
- Establish clear responsibilities for land readiness, permits, infrastructure, marketing, construction, and funding.
- Develop a repeatable residential delivery system before expanding widely.
- Select partners for governance quality as well as land location.

> Avoid copying prematurely: Entering many cities before project leadership and control systems are ready.

> First test: Screen a small number of potential land partnerships using one investment and governance template.

Summarecon: Company background and 5W1H

- Who: PT Summarecon Agung Tbk.
- What: Township development, investment-property management, and leisure/hospitality activities.
- Where: Originated in Kelapa Gading and expanded into additional township markets.
- When: Established in 1975; listed in 1990.
- Who is behind it: Soetjipto Nagaria and associates; the Nagaria family remains associated with the company’s development legacy.
- Why and how — analyst interpretation: Create neighbourhoods whose commercial and everyday functions strengthen residential demand over time.

Core research question: How does a developer make a new location commercially credible before it is fully mature?

Sources: Official company overview, May 2026 investor presentation.

Summarecon: Growth through successive townships

MILESTONE SEQUENCE

- 1975: Establishment and early development in Kelapa Gading.
- 1990: Stock-market listing.
- Later expansion: Application of township capabilities to Serpong and other markets.
- Subsequent development: A broader portfolio including Bekasi, Bandung, Karawang, Makassar, Bogor, and other locations.
- Current platform: Development sales supported by retained commercial and supporting assets.

Analyst interpretation: The capability being replicated is the coordination of a township—not simply a cluster design or a mall.

Sources: Official company overview, investor presentation and township histories.

Summarecon: How the growth model works

ANALYST ASSESSMENT

The model connects three activities:

- 1. Residential development generates sales and an initial population.
- 2. Commercial and community functions make the location more useful.
- 3. Estate and asset management help preserve the experience after handover.

Competitive advantage: Repeated coordination of physical development, commercial activity, and ongoing operations.

Economic tension: A facility may help sell surrounding property while taking years to achieve attractive standalone returns.

Summarecon: Financial performance and profit definitions

FY2025 REPORTED FIGURES, ROUNDED

- Revenue: Rp8.77 trillion
- Total profit for the year: Rp1.20 trillion
- Profit attributable to company owners: Rp767 billion
- FY2024 revenue: Rp10.62 trillion

INTERPRETATION

The difference between total profit and attributable profit is material. The two figures must not be interchanged in a peer comparison.

Lower annual revenue also demonstrates the importance of development recognition and project timing.

Source: Summarecon May 2026 presentation — consolidated income statements.

Summarecon: SWOT

ANALYST ASSESSMENT

STRENGTHS

- Established township-development capabilities
- Experience coordinating residential and commercial functions
- Recognisable development identity

WEAKNESSES / STRUCTURAL CONSTRAINTS

- Significant spending before township maturity
- Simultaneous projects compete for capital and management
- Annual results remain sensitive to handovers

OPPORTUNITIES

- Further development within established townships
- Better use of existing commercial infrastructure
- Selective replication in suitable markets

THREATS

- Buyers delaying purchases
- Oversupply of similar suburban products
- Financing costs and delayed infrastructure

Summarecon: Lessons for TANRISE

PROPOSED APPLICATIONS

- Define what makes each TANRISE location useful on an ordinary weekday.
- Sequence access, basic services, residential occupancy, and larger anchors.
- Give estate management a role in the development strategy.
- Set separate objectives for an anchor’s operating return and its contribution to surrounding property.
- Use smaller facilities to test demand before committing to major capital expenditure.

> First test: Create an activation and anchor plan for Sidoarjo, with timing tied to realistic occupancy.

> Avoid copying prematurely: Building a major retail anchor solely because mature competitors own malls.

Pakuwon: Company background and 5W1H

- Who: PT Pakuwon Jati Tbk.
- What: Mixed-use development with a substantial retained commercial-property platform.
- Where: Originated in Surabaya and subsequently expanded, including into Jakarta.
- When: Established in 1982; listed in 1989.
- Who is behind it: Alexander Tedja and the founding business-family legacy.
- Why and how — analyst interpretation: Combine retained assets that generate recurring income with property development and sales.

Relevant projects: Tunjungan City, Pakuwon Mall, Gandaria City, and Kota Kasablanka.

Sources: Official history and portfolio, 2025 annual report.

Pakuwon: Milestones in building recurring income

Period	Milestone	Strategic meaning
1982	Company established	Beginning of the platform
1986	Tunjungan Plaza I	Foundational retained retail asset
1989	Public listing	Broader capital access
2007	Entry into Jakarta	Geographic expansion
2010	Gandaria City opened	Replication of mixed-use development
2012	Kota Kasablanka opened	Further expansion of retained commercial income

FY2025 REVENUE APPROXIMATELY RP7.11

Source: Pakuwon company history.

trillion

SCALE SUPPORTED BY RECURRING OPERATIONS

Analyst interpretation: Retained assets became a cumulative income base, rather than being replaced each year through new sales.

Source: Pakuwon company history.

Pakuwon: How the growth model works

ANALYST ASSESSMENT

- Retain selected commercial assets.
- Develop an attractive tenant mix and visitor proposition.
- Maintain and improve the operating assets.
- Use adjacent residential, hotel, and office functions where commercially justified.
- Add further phases or locations when demand and funding support them.

Competitive advantage: An operating asset can generate income repeatedly, reducing reliance on new development handovers.

Pakuwon: How the growth model works

Trade-off: Retention ties up capital and creates continuing leasing, maintenance, refurbishment, and operating obligations.

Pakuwon: Financial evidence of the model

FY2025 REPORTED FIGURES, ROUNDED

- Revenue: Rp7.11 trillion
- Recurring revenue: approximately Rp5.62 trillion
- Recurring share of revenue: approximately 79%
- Profit attributable to owners: Rp2.35 trillion
- Total profit for the year: approximately Rp2.76 trillion

INTERPRETATION

Pakuwon provides a useful example of a large recurring-income base. This is different from assuming that any hotel or commercial asset will deliver the same economics.

Source: Pakuwon 2025 annual report — financial highlights and segment discussion.

Pakuwon: SWOT

ANALYST ASSESSMENT

STRENGTHS

- Significant recurring-income platform
- Experience in retail operations and mixed-use development
- Established destination assets

WEAKNESSES / STRUCTURAL CONSTRAINTS

- Large amount of capital retained in physical assets
- Continuing refurbishment and operating expenditure
- Exposure to retail and consumer activity

OPPORTUNITIES

- Improving productivity of existing space
- Selective extensions and redevelopment
- Replication where demand is established

THREATS

- Weaker tenant trading and household spending
- New competing destinations
- Financing costs, operating-cost inflation, and execution risk

Pakuwon: Lessons for TANRISE

PROPOSED APPLICATIONS

- Build recurring income only where there is demonstrable demand and operating capability.
- Measure cash contribution after maintenance and necessary reinvestment.
- Separate an attractive building from an attractive investment.
- Improve the productivity of existing retained assets before expanding the category.
- Use specialist operators where they improve outcomes under clear contracts.

First test: Review TANRISE's retained assets by occupancy, cash contribution, required capital expenditure, and return on invested capital.

Avoid copying prematurely: Attempting to build a Pakuwon-sized retail portfolio.

Agung Podomoro Land: Company background and 5W1H

- Who: PT Agung Podomoro Land Tbk.
- What: Residential and mixed-use development, with development sales and selected recurring assets.
- Where: A portfolio extending beyond its original Jakarta base.
- When: The group traces its origins to 1969; the listed issuer was established in 2004 and listed in 2010.
- Who is behind it: Group founder Anton Haliman and subsequent leadership associated with Trihatma Kusuma Haliman.
- Why and how — analyst interpretation: Combine multiple uses within developments, supported by development execution and selective retention of operating assets.

Key distinction: Group heritage is older than the listed company.

Sources: Group history, issuer overview.

Agung Podomoro Land: Milestones and changing emphasis

- 1969: Agung Podomoro Group established.
- 1973: Early Simprug completion and Sunter development.
- 1986: Leadership transition to Trihatma Kusuma Haliman.
- 2004: Establishment of the entity that became APLN.
- 2010: Asset consolidation and stock-market listing.
- Subsequent period: Expansion through urban mixed-use and residential projects.
- Recent period: Greater importance of asset monetisation, funding discipline, and selective development.

Analyst interpretation: Large accumulated portfolios create both opportunities and capital-management obligations.

Sources: Official history, 2025 annual report.

Agung Podomoro Land: How the model creates value

ANALYST ASSESSMENT

A mixed-use project can combine:

- Units sold to customers.
- Retained space that produces operating income.
- Shared access, infrastructure, and public areas.
- Commercial activity that supports surrounding property.

Potential advantage: Several uses can reinforce one another within a relatively concentrated site.

Potential weakness: Complex projects increase construction, leasing, phasing, financing, and governance requirements.

Agung Podomoro Land: How the model creates value

Research distinction: Selling a completed operating asset can release capital, but it may also reduce future recurring income.

Agung Podomoro Land: Financial scale and variability

FY2025 REPORTED FIGURES, ROUNDED

- Revenue: Rp3.57 trillion
- FY2024 revenue: Rp5.58 trillion
- Recurring revenue: approximately Rp1.36 trillion
- Profit attributable to owners: approximately Rp113 billion
- Total profit for the year: approximately Rp239 billion

INTERPRETATION

A sizeable physical portfolio does not automatically produce high attributable earnings.

Source: APLN 2025 annual report — financial highlights and operating review.

Agung Podomoro Land: Financial scale and variability

The year-to-year decline requires examination of handovers, asset disposals, financing, and operating mix—not a conclusion that the brand alone weakened.

Source: APLN 2025 annual report — financial highlights and operating review.

Agung Podomoro Land: SWOT

ANALYST ASSESSMENT

STRENGTHS

- Mixed-use development experience
- Recognisable projects and accumulated assets
- Ability to combine sale and retained components

WEAKNESSES / STRUCTURAL CONSTRAINTS

- Complex development and financing requirements
- Asset monetisation may reduce future operating income
- Portfolio size can exceed available capital or management capacity

OPPORTUNITIES

- More focused allocation of capital
- Partnerships and asset recycling
- Selective growth in suitable residential locations

THREATS

- Slow absorption of high-rise inventory
- Refinancing and construction-cost pressures
- Retail, office, or residential oversupply in individual markets

Agung Podomoro Land: Lessons for TANRISE

PROPOSED APPLICATIONS

- Give every major development a complete funding plan.
- Evaluate retained components separately from saleable inventory.
- Track capital tied up in completed but unproductive assets.
- Use partnerships or asset recycling where they improve returns.
- Match portfolio complexity to management capacity.

> First test: Establish a capital-productivity review for Voza Tower and other material inventory or retained assets, using client-confirmed ownership and operating data.

> Avoid copying prematurely: Complex mixed-use development without a clear sequence of demand, delivery, and financing.

Duta Pertiwi: Company background and 5W1H

- Who: PT Duta Pertiwi Tbk, a listed company within the BSDE/Sinar Mas Land structure.
- What: Township, residential, commercial, and managed-property activities.
- Where: Greater Jakarta and selected other Indonesian locations.
- When: Established in 1972; listed in 1994.
- Who is behind it: Its present group context is Sinar Mas Land through BSDE. Do not invent an individual founder where the reviewed evidence does not establish one.
- Why and how — analyst interpretation: Build on commercial-development experience while expanding into residential and township activities.

> Critical distinction: DUTI’s financial results are consolidated within BSDE.

Source: DUTI 2025 annual report — company profile and ownership.

Duta Pertiwi: Milestones

Period	Milestone
1972	Company established
1987	Early commercial and residential development
1989	Development of the Mangga Dua commercial concept
1994	Public listing
1996–1997	Kota Wisata and Legenda Wisata development milestones
2010	Acquisition into BSDE’s consolidated platform
Subsequent period	Further township and commercial-asset development

Sources: DUTI history, BSDE history.

Duta Pertiwi: Milestones

Research caution: An official group webpage compresses the establishment and later ownership chronology. The presentation should not imply that DUTI was founded in 1972 as a subsidiary of BSDE, which was established later.

Sources: DUTI history, BSDE history.

Duta Pertiwi: How the model works

ANALYST ASSESSMENT

DUTI illustrates the interaction between:

- Property developed for sale.
- Commercial properties and related activities.
- Township expansion.
- Capabilities and resources available within a larger group.

Competitive advantage: Experience accumulated across different property formats can support new development phases.

Duta Pertiwi: How the model works

> Important qualification: Affiliation does not make capital free, eliminate minority-shareholder interests, or guarantee equal profitability across projects.

Duta Pertiwi: Financial scale and consolidation

FY2025 REPORTED FIGURES, ROUNDED

- Revenue: Rp2.73 trillion
- FY2024 revenue: Rp4.42 trillion
- Profit attributable to owners: approximately Rp422 billion
- Total profit for the year: approximately Rp624 billion

INTERPRETATION

DUTI is a useful operating case, but counting it independently alongside BSDE creates an overlap when assessing developer groups.

Comparison rule: Choose either an issuer-based comparison or a group-based comparison, then apply the rule consistently.

Source: DUTI 2025 annual report — financial highlights.

Duta Pertiwi: SWOT

ANALYST ASSESSMENT

STRENGTHS

- Established development experience
- Mix of development and managed assets
- Access to a broader group platform

WEAKNESSES / STRUCTURAL CONSTRAINTS

- Complex group and subsidiary comparisons
- Development revenue remains sensitive to timing
- Different asset formats require different operating capabilities

OPPORTUNITIES

- New phases within established locations
- Better productivity of existing assets
- Selective reuse or repositioning of mature properties

THREATS

- Changes in retail and commercial demand
- Competition from newer destinations
- Affordability, construction, and financing pressures

Duta Pertiwi: Lessons for TANRISE

PROPOSED APPLICATIONS

- Make ownership, operation, and brand endorsement explicit.
- Establish a single project register across the relevant TANRISE reporting perimeter.
- Separate management arrangements from asset ownership.
- Report project economics before and after minority interests.
- Avoid double counting projects, revenue, or earnings across related platforms.

> First test: Produce a verified map of TANRISE entities, project companies, assets, operators, and reporting treatment.

> Avoid copying prematurely: A complicated corporate architecture without a clear commercial or financing purpose.

Alam Sutera: Company background and 5W1H

- Who: PT Alam Sutera Realty Tbk.
- What: Integrated residential and commercial development with selected operating assets.
- Where: Principal township identities include Alam Sutera and Suvarna Sutera; the portfolio also includes GWK Cultural Park in Bali.
- When: The corporate entity predates the Alam Sutera development, which began in 1994; public listing followed in 2007.
- Who is behind it: Haryanto Tirtohadiguno and the founding business-family legacy.
- Why and how — analyst interpretation: Build residential appeal through a coordinated environment and supporting commercial functions.

Sources: Official portfolio overview, 2025 annual report.

Alam Sutera: Development milestones

MILESTONE SEQUENCE

- 1994: Alam Sutera township development began.
- 2007: Public listing.
- 2010s: Additional commercial and office functions developed.
- 2012: Mall @ Alam Sutera.
- Subsequent period: Further development of Suvarna Sutera and operating assets.
- Current portfolio: Township development combined with commercial and tourism-related activities.

Analyst interpretation: The company demonstrates both the value of a coherent township identity and the additional complexity created by diversification.

Source: Official Alam Sutera overview and portfolio.

Alam Sutera: How the growth model works

ANALYST ASSESSMENT

The township model depends on creating confidence in a location through:

- Access and infrastructure.
- Residential delivery.
- Supporting facilities.
- Commercial activity.
- Continuing estate quality.

Competitive advantage: A recognisable environment can support customer preference across development phases.

Alam Sutera: How the growth model works

Strategic tension: Diversification can introduce different demand cycles and operating requirements. Tourism assets, offices, retail, and residential projects should not be assessed using the same performance measures.

Alam Sutera: Financial results and earnings quality

FY2025 REPORTED FIGURES, ROUNDED

- Revenue: Rp2.93 trillion
- FY2024 revenue: Rp3.43 trillion
- Profit attributable to owners: approximately Rp313 billion
- FY2024 attributable profit: approximately Rp55 billion

INTERPRETATION

Attributable profit increased despite lower revenue. This requires examination of margins, financing, and other income or expenses before attributing the improvement to sales growth.

Data rule: Do not substitute comprehensive income for net profit.

Source: ASRI 2025 annual report — audited financial statements.

Alam Sutera: SWOT

ANALYST ASSESSMENT

STRENGTHS

- Established township identity
- Integrated residential and commercial environment
- Experience in long-term area development

WEAKNESSES / STRUCTURAL CONSTRAINTS

- Capital committed across different business formats
- Financing can reduce flexibility
- Mature areas require future pipeline replenishment

OPPORTUNITIES

- Additional phases in suitable locations
- Greater productivity of existing assets
- Better alignment of product and local demand

THREATS

- Competing residential products
- Interest-rate and refinancing pressures
- Tourism volatility and environmental risks

Alam Sutera: Lessons for TANRISE

PROPOSED APPLICATIONS

- Make each development's promise visible in its physical environment.
- Protect basic delivery and estate standards.
- Replenish the pipeline before mature projects run short of suitable inventory.
- Evaluate diversification against capital availability and operating capability.
- Test whether a destination attracts repeat use rather than occasional visits.

> First test: For Taman Dayu, distinguish permanent residents, weekday users, weekend visitors, and event-driven demand.

> Avoid copying prematurely: Diversification justified by the appeal of a destination concept without validated economics.

Jaya Real Property: Company background and 5W1H

- Who: PT Jaya Real Property Tbk, part of Pembangunan Jaya Group.
- What: Residential development, commercial property, and supporting urban businesses.
- Where: Primarily South Jakarta and Tangerang, with Bintaro Jaya as its foundational development.
- When: Established as PT Bintaro Raya in 1979; listed in 1994.
- Who is behind it: Pembangunan Jaya Group. Its broader group history must not be substituted for the issuer’s own establishment story.
- Why and how — analyst interpretation: Serve residential demand through livable communities, useful amenities, and connectivity.

Sources: Official corporate profile, historical annual report.

Jaya Real Property: Milestones in community development

- 1979: Establishment as PT Bintaro Raya.
- Subsequent development: Progressive expansion of Bintaro Jaya.
- 1992: Change to the Jaya Real Property name.
- 1994: Public listing.
- Later phases: Additional commercial, leisure, and supporting urban functions.
- 2024: DoubleTree by Hilton Jakarta Bintaro Jaya opening and Jurangmangu station service improvements.
- FY2025: Reported revenue approximately Rp3.27 trillion.

Analyst interpretation: The case illustrates the cumulative value of a location becoming more convenient and useful over decades.

Sources: Historical annual report, official results and announcements.

Jaya Real Property: How the growth model works

ANALYST ASSESSMENT

- Develop residential communities in successive phases.
- Improve the practical experience of living in the area.
- Add commercial functions as the population and catchment support them.
- Strengthen access and connectivity.
- Manage the area to preserve its appeal.

Competitive advantage: Everyday usefulness can be more durable than a launch campaign.

Strategic qualification: A successful mature township does not mean every supporting facility should be built immediately in a new location.

Jaya Real Property: Financial scale and disclosure caution

FY2025 FIGURES DISPLAYED BY THE COMPANY

- Revenue: approximately Rp3.27 trillion
- Income for the year: approximately Rp1.32 trillion
- Marketing sales: approximately Rp2.47 trillion

> Important distinction

The headline income figure should not automatically be treated as profit attributable to owners. The audited attributable-profit line must be used before building a uniform profit-ranking chart.

Analyst interpretation: This case is useful for studying disciplined community development, rather than simply pursuing maximum reported revenue.

Source: Jaya Real Property — official latest results.

Jaya Real Property: SWOT

ANALYST ASSESSMENT

STRENGTHS

- Established community and location identity
- Integrated residential and commercial functions
- Connectivity and accumulated amenities

WEAKNESSES / STRUCTURAL CONSTRAINTS

- Concentration in a limited number of geographic markets
- Mature areas require careful pipeline planning
- Long development periods tie up capital

OPPORTUNITIES

- Better use of established catchments
- Additional services supported by resident demand
- Selective development and asset improvements

THREATS

- New competing townships
- Infrastructure congestion
- Affordability and mortgage constraints

Jaya Real Property: Lessons for TANRISE

PROPOSED APPLICATIONS

- Sell a credible daily-life proposition.
- Translate “best concept” into local needs, access, services, and price.
- Sequence commercial development around actual resident demand.
- Make connectivity a measurable part of product selection.
- Treat estate management as part of long-term value creation.

> First test: Develop a customer journey for a Sidoarjo household covering work, school, shopping, healthcare, travel time, and monthly housing cost.

Jaya Real Property: Lessons for TANRISE

> Avoid copying prematurely: Assuming that a new township can immediately reproduce the amenity depth of a mature community.

PANI: Company background and 5W1H

- Who: PT Pantai Indah Kapuk Dua Tbk.
- What: A listed property-development platform associated with the PIK2 area.
- Where: The northern Jakarta–Tangerang/Banten coastal development corridor.
- When: The issuer originated in another industry and listed in 2018; its property transformation followed a controlling-shareholder change in 2021.
- Who is behind it: PT Multi Artha Pratama, with sponsorship associated with Agung Sedayu Group and Salim Group.
- Why and how — analyst interpretation: Combine a large development pipeline, sponsor capabilities, corporate transactions, and capital-market funding.

Key distinction: PANI is not the entirety of either sponsor group or every asset carrying the PIK identity.

Source: Official company history.

PANI: The transformation was accelerated by corporate actions

Period	Milestone
2001	Commercial operations in can packaging
2018	Public listing
2021	Change in controlling shareholder
2022	Rights issue and property-platform expansion
2023	Further rights issue of approximately Rp10.5 trillion
2024	Private placements raising approximately Rp6.5 trillion
2025	CBDK subsidiary listing and further development of the operating platform

Source: PANI official history and corporate-action chronology.

PANI: The transformation was accelerated by corporate actions

Analyst interpretation: This is not a simple story of a small developer growing exclusively through retained profits. Capital raising and asset acquisition are central to the case.

Source: PANI official history and corporate-action chronology.

PANI: How the growth model works

ANALYST ASSESSMENT

The model connects:

- Sponsor development experience.
- Access to a substantial project pipeline.
- Capital raised through listed entities.
- Residential and commercial handovers.
- Destination and connectivity investments intended to strengthen area demand.

Competitive advantage: Funding capacity and coordinated development can accelerate the scale of a platform.

Evidence reference: PANI financial-results release.

PANI: How the growth model works

Trade-offs: Dilution, transaction governance, land readiness, infrastructure delivery, and concentration all require close attention.

Evidence reference: PANI financial-results release.

PANI: Financial scale and the limits of headline growth

FY2025 REPORTED FIGURES, ROUNDED

- Revenue: approximately Rp4.3 trillion
- Profit attributable to the parent: approximately Rp1.1 trillion
- Reported revenue growth: approximately 52%
- Reported attributable-profit growth: approximately 83%

INTERPRETATION

These results demonstrate expansion of the listed platform. They do not, by themselves, separate organic development growth from the effects of acquired assets, funding, or changes in the reporting perimeter.

Source: PANI FY2025 financial-results release.

PANI: SWOT

ANALYST ASSESSMENT

STRENGTHS

- Sponsor capabilities and capital-market access
- Large coordinated development opportunity
- Ability to combine residential and commercial activity

WEAKNESSES / STRUCTURAL CONSTRAINTS

- Geographic concentration
- Dependence on infrastructure and staged delivery
- Corporate actions complicate organic-growth assessment

OPPORTUNITIES

- More activity within the development corridor
- Additional employment and destination functions
- Development of selected operating income

THREATS

- Affordability and speculative-demand cycles
- Land, permitting, and infrastructure execution risks
- Coastal physical risks and environmental obligations

PANI: Lessons for TANRISE

PROPOSED APPLICATIONS

- Consider strategic investors, partnerships, and capital raising as possible tools.
- Match funding commitments to a verified development pipeline.
- Evaluate acquisitions using cash flow, legal readiness, and management capacity.
- Distinguish growth created through operations from growth created through transactions.
- Preserve shareholder economics when seeking scale.

> First test: Compare organic growth, land partnerships, and acquisition-led growth under one funding and return framework.

> Avoid copying prematurely: Assuming that public-market capital will be available on favourable terms whenever needed.

Ten companies, different sources of competitive advantage

ANALYST SYNTHESIS

Developer	Most useful capability to study
BSDE	Long-term township development and pipeline coordination
LPKR	Affordability, portfolio complexity, and strategic refocusing
CTRA	Partnership-based replication across markets
SMRA	Township sequencing and activation
PWON	Retained-asset operations and recurring income
APLN	Mixed-use economics and capital allocation

Ten companies, different sources of competitive advantage

Developer	Most useful capability to study
DUTI	Project platforms within a consolidated group
ASRI	Township identity, diversification, and funding discipline
JRPT	Community usefulness and connectivity
PANI	Sponsor-backed expansion and capital-market transactions

> Key conclusion: No single competitor provides a complete model for TANRISE.

What TANRISE can adopt, adapt, or defer

PROPOSED APPLICATION

Adopt as operating discipline	Adapt through pilots	Defer until prerequisites exist
Verified project and land register	Landowner partnerships	Very large speculative anchors
Affordability and customer research	Employer-linked residential demand	Broad geographic expansion
Phased development and cash planning	Smaller community and commercial facilities	Major acquisitions without integration capacity

What TANRISE can adopt, adapt, or defer

Adopt as operating discipline	Adapt through pilots	Defer until prerequisites exist
Inventory and asset-productivity reviews	Selective recurring-income investments	Complex mixed-use development without funding
Clear owner/operator responsibilities	New locations after repeatable delivery	Diversification driven mainly by image

> Key message: TANRISE should copy decision quality before copying portfolio breadth.

TANRISE’s current economics should shape the growth plan

FY2025 AUDITED BASELINE

- Consolidated revenue: approximately Rp410.7 billion
- Profit attributable to owners: approximately Rp87.2 billion
- Hotel revenue: approximately Rp180.5 billion
- Apartment sales: approximately Rp151.4 billion

ANALYST INTERPRETATION

The existing revenue mix differs from the leadership ambition to make residential and industrial/warehousing the main growth engines.

That creates a practical transition question: how will TANRISE fund and execute new growth while maintaining or improving the productivity of existing assets?

Source: TANRISE FY2025 audited statements — revenue note 27 and profit-attribution statement.

The 2035 ambition requires a moving-target calculation

ILLUSTRATIVE REVENUE SCENARIOS, NOT FORECASTS

PWON’s FY2025 revenue of approximately Rp7.11 trillion is the fifth-highest within this selected cohort.

Starting from TANRISE’s FY2025 revenue of approximately Rp0.411 trillion:

Assumed annual growth of that benchmark	Illustrative benchmark in 2035	TANRISE revenue CAGR required, 2025–2035
0%	Rp7.11 trillion	33.0%
3%	Rp9.56 trillion	37.0%
5%	Rp11.58 trillion	39.6%

Sources: PWON audited baseline, TANRISE audited baseline. Calculations are analyst-derived.

The 2035 ambition requires a moving-target calculation

Assumed annual growth of that benchmark	Illustrative benchmark in 2035	TANRISE revenue CAGR required, 2025–2035
8%	Rp15.35 trillion	43.6%

INTERPRETATION

Reaching the current benchmark requires approximately 17.3 times TANRISE’s FY2025 revenue. Competitors may grow, decline, merge, or change their portfolios.

This calculation does not prove national Top Five status or address the separate profit ambition.

Calculation: Benchmark × (1 + assumed growth)¹ ; required CAGR = (2035 benchmark ÷ TANRISE baseline)¼ − 1.

Sources: PWON audited baseline, TANRISE audited baseline. Calculations are analyst-derived.

Proposed TANRISE capability roadmap

2026–2027: Establish the operating foundation

- Verify land, projects, ownership, and pipeline readiness.
- Validate priority customer segments.
- Improve capital productivity in existing assets.
- Strengthen project leadership and financial controls.

2028–2030: Demonstrate repeatability

- Deliver successive residential phases.
- Expand industrial/warehousing activity where demand is evidenced.
- Prove partnership governance and project economics.

Proposed TANRISE capability roadmap

- Add recurring assets selectively.

2031–2033: Scale proven capabilities

- Replicate successful models in suitable markets.
- Consider acquisitions only with funding and integration capacity.
- Expand organisational capacity alongside the pipeline.

2034–2035: Assess competitive position

- Recalculate the market benchmark.
- Compare revenue and attributable profit separately.
- Test cash generation, returns, and resilience.

Measures that connect ambition to execution

PROPOSED MANAGEMENT SCORECARD

Area	Measures
Market position	Revenue and attributable-profit position within a defined peer universe
Demand	Qualified leads, conversion, mortgage approval, cancellations
Development	Launch readiness, absorption, construction progress, handover timeliness
Cash	Collections, project cash requirements, liquidity headroom
Land	Legally ready pipeline, replenishment, infrastructure readiness
Capital productivity	Inventory age, asset cash contribution, return on invested capital

Measures that connect ambition to execution

Area	Measures
Recurring operations	Occupancy, income collection, operating cash contribution, maintenance requirements
Organisation	Project leadership capacity, delivery workload, reporting reliability

> Key message: Revenue rank is an outcome. These measures show whether the business can sustain it.

> Status: Proposed framework; numerical targets require TANRISE baseline data and approval.

Research gaps before committing to a Top Five plan

MARKET-DEFINITION GAPS

- Is the ambition based on listed issuers, consolidated groups, or all Indonesian developers?
- Are private developers included?
- What treatment applies to subsidiaries and mixed-sector businesses?

FINANCIAL GAPS

- A complete attributable-profit comparison using consistent definitions.
- Normalisation of material disposals and other exceptional transactions.
- Project-level cash requirements and available funding.

TANRISE-specific gaps

- Verified land and project pipeline.
- Capacity of each project to support the required revenue scale.
- Household and employer demand for Sidoarjo.
- Industrial/warehousing tenant requirements.
- Asset-productivity options for existing holdings.
- Management and delivery capacity.

> Key message: The ambition becomes actionable when the missing operating and financial evidence is resolved.

Designer research and asset brief

RECOMMENDED VISUAL MATERIALS

- 1. Ownership diagrams: Distinguish group, issuer, subsidiary, project owner, and operator.
- 2. Company timelines: Separate operating milestones from corporate transactions.
- 3. Project maps: Use verified locations and label selected examples rather than implying exhaustive coverage.
- 4. Financial charts: Preserve reporting period, units, profit definition, and consolidation caveats.
- 5. Business-model diagrams: Label these as analytical interpretations.
- 6. SWOT matrices: Label as analyst assessment.
- 7. TANRISE roadmap: Label as proposed.

Designer research and asset brief

- 8. Project imagery: Use official photographs, masterplans, or annual-report images with permission where required.

SUGGESTED COMPANY IMAGERY

Company	Useful visual subjects
BSDE	BSD City masterplan and township infrastructure
LPKR	Lippo Village and residential product examples
CTRA	Examples of projects in different cities
SMRA	Township phasing and functioning commercial anchors
PWON	Tunjungan City, Gandaria City, Kota Kasablanka

Designer research and asset brief

Company	Useful visual subjects
APLN	Mixed-use developments and contrasting asset formats
DUTI	Mangga Dua and township examples
ASRI	Alam Sutera, Suvarna Sutera, and separately labelled GWK
JRPT	Bintaro Jaya, everyday amenities, and connectivity
PANI	PIK2 development area and corporate-action chronology

IMAGE-USE INSTRUCTION

Official website availability does not establish an open licence. Record the image owner, source, publication date, and permission or licence status. Keep architectural renderings clearly labelled as renderings.

Final research principle

TANRISE’s advantage should come from a focused growth model that it can fund, deliver, and repeat—supported by a credible brand and measurable customer value.

DEEP DIVE

Competitive Strategy Deep Dive

How Indonesia’s Major Developers Build Demand, Trust, and Financial Scale

What makes a developer’s strategy effective?

A developer’s competitive advantage comes from how several decisions reinforce one another:

- 1. Market selection: Which customers and locations does it prioritise?
- 2. Product economics: What can those customers afford, and what can the developer deliver profitably?
- 3. Brand strategy: What gives customers, landowners, banks, and tenants confidence?
- 4. Demand creation: Why would people want to live, work, or operate there?
- 5. Sales conversion: How does the developer remove obstacles between interest and purchase?
- 6. Capital strategy: How does it fund the next phase without exhausting cash?
- 7. Delivery: Does the completed experience support the next launch?

What makes a developer’s strategy effective?

Analytical principle: A strong campaign cannot permanently compensate for an unsuitable location, unaffordable product, or unreliable delivery.

The brands operate at different levels

ANALYTICAL INTERPRETATION OF THE OBSERVED PORTFOLIOS

Developer	Most useful brand mechanism to examine	Commercial purpose
BSDE / Sinar Mas Land	Corporate endorsement + BSD destination identity + cluster brands	Combine delivery confidence with different product propositions
Lippo Karawaci	Township identity + clearly differentiated housing series	Make products relevant to distinct budgets and household needs
Ciputra	Recognisable development identity across locally adapted projects	Transfer confidence across cities and attract land partners

The brands operate at different levels

Developer	Most useful brand mechanism to examine	Commercial purpose
Summarecon	Corporate name closely attached to township names	Transfer expectations from established places to new developments
Pakuwon	Strong destination brands within an operating portfolio	Attract visitors, tenants, residents, and hotel customers
Agung Podomoro	Developer endorsement + project identity + tangible design propositions	Make products recognisable and easier to evaluate
Duta Pertiwi	Township brands combined with specialist partner brands	Add credible capabilities to existing locations

The brands operate at different levels

Developer	Most useful brand mechanism to examine	Commercial purpose
Alam Sutera	Place identity supported by a range of project and cluster propositions	Serve different purchasing capacities without one uniform offer
Jaya Real Property	Established place brands supported by practical livability	Sell an everyday living environment
PANI	PIK2 destination identity supporting multiple product categories	Connect residential and commercial demand to an expanding location

These are analytical descriptions, not claims that the companies formally use these exact brand-strategy terms.

BSDE: Building an economic identity for the location

DOCUMENTED STRATEGIC DECISION

BSD’s Digital Hub was introduced in 2017 as a dedicated technology and digital-business area. An official 2021 disclosure identified an ecosystem including Apple Developer Academy, Traveloka, NTT, SIRCLO, and other businesses. These are different forms of participation; they should not all be described as identical tenants or investments. Source: Sinar Mas Land’s Digital Hub disclosure.

BRAND STRATEGY — ANALYTICAL INTERPRETATION

BSD is being positioned as a place with an economic purpose, beyond its residential inventory. Technology businesses and education provide tangible support for that identity.

BUSINESS MECHANISM

- Employers create reasons to travel to the area.
- Education and talent activity make the location more relevant to businesses.

BSDE: Building an economic identity for the location

- Workers, students, and visitors can support surrounding services.
- The broader activity base can improve the proposition for residential and commercial property.

The important strategic move is recruiting the organisations that make the destination promise credible.

WHY THIS CAN BE EFFECTIVE

A location connected to employment and education can address a more enduring need than a residential theme alone.

EVIDENCE LIMIT

The reviewed disclosure does not quantify how much Digital Hub increased housing prices, absorption, or profit.

BSDE: Combining brand confidence with purchase-friction removal

DOCUMENTED MARKETING EXECUTION

The 2025 Move in Quickly programme used three sales periods and product-dependent incentives, including price reductions, down-payment support, transaction-cost relief, and other benefits. Separate participation in BCA Expo placed property offers alongside a financing-related customer occasion. These were historical offers subject to conditions, not current universal prices. Sources: programme structure, BCA Expo campaign.

WHY THE MECHANISM MATTERS — ANALYSIS

A customer can trust a developer and want its product while still being unable to transact.

Different incentives address different obstacles:

Obstacle	Relevant commercial response
Insufficient initial cash	Down-payment support

BSDE: Combining brand confidence with purchase-friction removal

Obstacle	Relevant commercial response
High all-in acquisition cost	Tax or transaction-fee assistance
Uncertainty about financing	Bank-linked sales channels
Delayed decision	Clearly defined campaign periods
Difficulty comparing inventory	Searchable product information and sales support

BUSINESS IMPLICATION

Marketing is coordinating inventory, financing, timing, and communication—not merely generating awareness.

TANRISE application

Identify the actual barrier for each priority segment before designing a promotion. Track the net realised selling price and collections after incentives, rather than celebrating bookings alone.

Lippo: Changing the product to reach a different customer

DOCUMENTED STRATEGIC DECISION

Lippo’s sustainability reporting describes market studies and ethnographic research into younger Indonesian buyers. It links that work to housing products at different price points and a shift toward community-oriented living environments.

XYZ Livin was presented at approximately Rp300–600 million, targeting young families and professionals. These were historical disclosed prices. Source: Lippo’s product-research and XYZ Livin discussion.

BRAND STRATEGY — ANALYTICAL INTERPRETATION

Product-series identities allow the developer to communicate different combinations of affordability, layout, functionality, and aspiration within a larger township.

BUSINESS MECHANISM

The strategic sequence is:

Lippo: Changing the product to reach a different customer

Understand purchasing capacity › redesign the product › define the relevant lifestyle proposition › organise financing and selling.

This is more consequential than applying a youthful campaign to an unchanged, unaffordable house.

WHY IT CAN BE EFFECTIVE

A lower total ticket can expand the pool of eligible buyers. Functional design can help smaller homes remain desirable.

> Critical trade-off

Lippo: Changing the product to reach a different customer

Lower ticket prices must still support adequate margins, acceptable living quality, and manageable infrastructure costs per unit.

Lippo: Turning an affordable proposition into a repeatable launch system

DOCUMENTED RESULTS

LPKR reported FY2024 marketing sales of approximately Rp6.01 trillion, up 17%, with residential products contributing 64%. It identified continuing demand for earlier housing series and contributions from subsequent launches.

The company also reported that first-stage Park Serpong handovers began in November 2024, within less than 18 months. These are issuer-reported results. Source: LPKR’s March 2025 sales announcement.

WHY THE MECHANISM MATTERS — ANALYSIS

- A recognisable product family reduces the need to explain every new release from zero.
- Multiple formats provide a price and functionality ladder.
- Successive phases let the developer respond to demand.

Lippo: Turning an affordable proposition into a repeatable launch system

- Visible delivery gives later buyers evidence beyond renderings.

WHAT THE EVIDENCE DOES NOT ESTABLISH

It does not isolate the contribution of naming, digital advertising, affordability, financing, or broader market conditions.

TANRISE APPLICATION

For Sidoarjo, define specific household segments and their payment capacity before deciding the product range. Validate whether the preferred format meets both customer needs and project economics.

Ciputra: Using the brand to acquire business opportunities

DOCUMENTED BUSINESS STRATEGY

Ciputra's 2025 reporting describes joint operations, joint ventures, and strategic partnerships. Partners generally contribute land, while Ciputra provides planning, construction, marketing, and sales capabilities.

Its investor presentation explicitly connects continued joint-operation schemes with leveraging Ciputra brand equity. Sources: 2025 annual report, joint operations, growth-strategy presentation.

BRAND STRATEGY — ANALYTICAL INTERPRETATION

The brand serves two customers:

- Homebuyers: Confidence in the development.
- Landowners: Confidence that the developer can turn land into a commercially viable project.

Why this is strategically powerful

Reputation can improve access to opportunities, not only sales conversion.

A landowner with limited development capability may value a partner that can organise design, permissions, construction, selling, and delivery.

ECONOMIC MECHANISM

Partnerships can reduce the need for outright upfront land acquisition and introduce local knowledge. They do not eliminate development expenditure, governance risk, or the partner’s share of profits.

Ciputra: Standardising capabilities while adapting products locally

DOCUMENTED STRATEGIC DIRECTION

Ciputra’s investor materials combine geographic diversification, continued land replenishment, innovative launches, complementary amenities, and prudent capital management. Source: Ciputra growth-strategy presentation.

HOW THE SYSTEM WORKS — ANALYSIS

The replicable component is the development organisation:

- Project feasibility.
- Design and procurement discipline.
- Sales management.
- Financial controls.

Ciputra: Standardising capabilities while adapting products locally

- Construction and handover processes.

The locally adaptable component is the customer offer:

- Price.
- Unit configuration.
- Release size.
- Amenity priorities.
- Communication and distribution channels.

WHY THIS CAN BE EFFECTIVE

The company can reuse operating knowledge without assuming that customers in every city want the same home.

Brand implication

A common development identity provides reassurance; project-level propositions supply local relevance.

TANRISE APPLICATION

Create a repeatable development system before attempting rapid geographic expansion. A landowner-partnership proposal should specify TANRISE’s capabilities, governance, funding responsibilities, and delivery record.

Summarecon: Transferring the reputation of an established place

DOCUMENTED BRAND EXECUTION

Summarecon Crown Gading launched using the theme “New City, New Kelapa Gading.” The launch explicitly connected the new township with the company’s established Kelapa Gading development.

For its November 2022 launch, the company reported an initial offering of 244 homes, expanded through additional stages to 390 reported sales over six hours, with a stated sales value of approximately Rp827 billion. Source: Crown Gading launch release.

WHY THE BRAND MECHANISM MATTERS — ANALYSIS

A new township asks customers to believe in a future environment.

Referencing a familiar, functioning development gives buyers a concrete model for that future. The developer’s track record helps reduce the perceived risk of buying before the new location matures.

Business implication

Past delivery can support demand for new land and new phases.

EVIDENCE CAUTION

Launch sales are not the same as completed handovers or audited recognised revenue. The release does not establish how many purchases later cancelled.

Summarecon: Selling the next economic layer of the township

DOCUMENTED SEQUENCE

After the initial residential launch, Crown Gading introduced Gading Bulevar Commercial in September 2023. The company reported 66 shophouses sold, across successive stages, with a stated sales value of approximately Rp200 billion.

The proposition highlighted gateway positioning, boulevard access, future facilities, and named businesses preparing to operate. Source: Gading Bulevar launch release.

WHY THE MECHANISM MATTERS — ANALYSIS

Residential buyers and commercial buyers require different arguments:

- A household evaluates living quality and affordability.
- A business evaluates access, visibility, catchment, and customer activity.

Summarecon: Selling the next economic layer of the township

- An investor evaluates likely occupancy, income, and resale prospects.

The marketing story changes with the product’s economic function.

> Critical distinction

Early residential sales can support interest in commercial property, but they do not prove sufficient occupied households or sustainable tenant turnover.

TANRISE APPLICATION

Separate household marketing from business-occupier marketing. For commercial phases, show verified catchment and operating demand rather than relying on residential launch success.

Pakuwon: The marketing customer is also the tenant

DOCUMENTED OPERATING STRATEGY

Pakuwon’s 2025 report describes selective tenant-mix curation, prioritising food and beverage, entertainment, and lifestyle uses, together with experience-based marketing and digital integration. Source: Pakuwon 2025 annual report, marketing discussion.

BRAND STRATEGY — ANALYTICAL INTERPRETATION

A mall brand must create value for two connected audiences:

- Visitors need reasons to return.
- Tenants need commercially useful customer traffic.

BUSINESS MECHANISM

- 1. Recruit a relevant tenant mix.

Pakuwon: The marketing customer is also the tenant

- 2. Make the destination useful and enjoyable.
- 3. Encourage repeat visits and time spent.
- 4. Support tenant trading.
- 5. Sustain leasing demand and rental income.

WHY IT CAN BE EFFECTIVE

The operating asset becomes a continuing customer-acquisition environment for its tenants.

> Important qualification

Footfall alone is insufficient. A crowded event can generate weak tenant spending or poor returns after activation costs.

Pakuwon: Reinvesting in the reasons people visit

DOCUMENTED EXECUTION

Pakuwon’s 2024 report describes new sports-fashion, food, beauty, and entertainment tenants, alongside events intended to attract visitors and support tenant sales.

The company reported approximately 95% mall occupancy and 10% growth in shopping-centre revenue for that year. These are concurrent operating results, not proof that events alone caused the growth. Source: Pakuwon revised 2024 annual report.

WHY THIS IS MORE THAN PROMOTION — ANALYSIS

Tenant selection changes the product itself. Events and communication then amplify that product.

An operator must continuously decide:

- Which categories attract the desired catchment?

Pakuwon: Reinvesting in the reasons people visit

- Which tenants deserve additional space?
- Which areas need improvement?
- Which activities generate repeat visits?
- Does incremental income justify reinvestment?

TANRISE APPLICATION

For retained commercial or hospitality assets, evaluate the operating proposition before increasing promotion. Measure repeat use, customer spending, occupancy quality, and net cash contribution.

Agung Podomoro: Turning a design concept into a recognisable offer

DOCUMENTED PRODUCT STRATEGY

In 2025, Agung Podomoro promoted The Garden House, incorporating courtyard design across several projects, including Podomoro Park Bandung and Kota Podomoro Tenjo.

Its annual report also describes efficient unit configurations, differentiated price ranges, flexible payment arrangements, customer-database management, agent cooperation, and online booking development. Sources: Garden House announcement, 2025 annual report, marketing and pricing.

BRAND STRATEGY — ANALYTICAL INTERPRETATION

A visible design feature provides a more concrete proposition than a broad claim about modern or sustainable living.

WHY THE MECHANISM MATTERS

Customers can assess how the feature changes their daily experience: light, ventilation, privacy, usable space, and maintenance.

Business trade-off

A distinctive feature must justify its cost and fit the target household. A courtyard is not automatically valuable in every plot configuration or price segment.

Agung Podomoro: Bringing the demonstration closer to buyers

DOCUMENTED MARKETING EXECUTION

In October 2025, Kota Podomoro Tenjo opened two show units at its marketing gallery in Central Park, Jakarta. The launch included product-knowledge sessions and an agent gathering. Source: official show-unit announcement.

WHY THE MECHANISM MATTERS — ANALYSIS

For a project outside the buyer’s regular travel pattern, the first site visit can be a significant obstacle.

An accessible demonstration location can:

- Make initial product evaluation easier.
- Help salespeople explain layouts and specifications.
- Train agents around a consistent proposition.

Agung Podomoro: Bringing the demonstration closer to buyers

- Qualify buyers before a longer project visit.

WHAT REMAINS UNPROVEN

The announcement does not disclose incremental sales, acquisition cost, or conversion compared with other channels.

TANRISE APPLICATION

Test demonstration spaces near the priority customer catchment—including employer locations where appropriate—before committing to a large permanent sales facility.

Duta Pertiwi: Borrowing specialist capability through partnerships

DOCUMENTED BUSINESS DEVELOPMENT

DUTI’s 2025 report describes a collaboration through a subsidiary with Sumitomo Forestry Indonesia for Kota Wisata Ecovia, including the initial Orlens cluster.

The same report describes ARTOTEL Living World Kota Wisata, which began operating in August 2025. Source: DUTI 2025 annual report, management discussion and portfolio development.

BRAND STRATEGY — ANALYTICAL INTERPRETATION

Different partners can supply different forms of credibility:

- Development or design expertise.
- Retail and tenant relationships.
- Hotel operations.

Duta Pertiwi: Borrowing specialist capability through partnerships

- A recognisable customer proposition.

WHY THIS CAN BE EFFECTIVE

The developer can add a function to the township without independently building every specialist capability.

> Critical trade-off

Partnerships require clear economics, control rights, service standards, and accountability. A well-known partner’s name does not itself establish attractive project returns.

Duta Pertiwi: Using operating destinations to deepen the township proposition

DOCUMENTED EXAMPLE

Living World’s official portfolio records its Kota Wisata opening in 2024 and Grand Wisata opening in February 2025. Its retail proposition combines home-related shopping, lifestyle, food, and entertainment.

The Grand Wisata destination also used a purchase-linked rewards programme supported by the MyLiving application. Sources: Kawan Lama’s Living World portfolio, Grand Wisata rewards programme.

WHY THE MECHANISM MATTERS — ANALYSIS

A functioning destination can give residents and surrounding customers recurring reasons to visit. A rewards programme can support identifiable customer relationships and repeat purchasing.

BUSINESS QUESTION

Does the asset earn an adequate direct return, improve surrounding property demand, or both? Those benefits must be tested separately.

TANRISE application

Before launching a membership or loyalty programme, establish a service or destination that people already have a reason to use repeatedly.

Alam Sutera: Segmenting the payment proposition

DOCUMENTED CUSTOMER BEHAVIOUR

ASRI's 1H2025 investor presentation shows a materially different payment mix between its locations:

- Alam Sutera: approximately 47.6% cash instalments and 43.7% mortgages.
- Suvarna Sutera: approximately 22.9% cash instalments and 67.4% mortgages.

These are period-specific sales-payment profiles, not complete demographic descriptions. Source: ASRI investor presentation, payment-profile analysis.

WHY THIS MATTERS — ANALYSIS

Two projects within one company can require different conversion systems.

A mortgage-dependent project needs particular attention to bank approval, documentation, eligibility, and payment stability.

Alam Sutera: Segmenting the payment proposition

A project with greater instalment usage needs close attention to collection schedules and the developer’s financing exposure.

BRAND IMPLICATION

The corporate identity can remain consistent while the payment proposition and sales conversation differ by market.

TANRISE APPLICATION

Segment by financial behaviour as well as age and income.

Alam Sutera: A successful launch can materially change the sales mix

DOCUMENTED PERFORMANCE

ASRI reported approximately Rp1.39 trillion in 1H2025 marketing sales. Its presentation identified Sutera Rasuna as contributing approximately 43% of residential marketing sales.

Its 2025 annual report describes market research, product variation across prices, show units, exhibitions, strategic-location media, and digital channels. Sources: investor presentation, annual report, marketing discussion.

WHY THE MECHANISM MATTERS — ANALYSIS

The performance of one relevant release can matter more than the total number of campaigns.

A useful research question is whether the release filled a gap in price, layout, location, financing, or available inventory.

Evidence limit

The disclosures do not isolate which of those factors drove Sutera Rasuna’s contribution.

TANRISE APPLICATION

Compare product cohorts. Identify which configurations convert qualified demand into collected sales, then adjust subsequent releases.

Jaya Real Property: Building a portfolio of customer propositions

DOCUMENTED PRODUCT SEGMENTATION

JRPT’s FY2024 sales announcement presented materially different offers:

- Aura–Discovery Flamine: homes in an established environment at approximately Rp4.8–6.1 billion.
- Thalassa at Puri Jaya: approximately Rp588–730 million.
- Kasuari Straits: housing combined with entrepreneurial space, starting around

Rp490 million.

These are historical disclosed offers with differing specifications and terms. Source: JRPT FY2024 marketing-sales announcement.

Brand strategy — analytical interpretation

The company does not rely on one universal meaning of “aspirational housing.”

It translates aspiration into different practical outcomes:

- Established family convenience.
- Accessible home ownership.
- Space that supports earning an income.

WHY THIS CAN BE EFFECTIVE

The customer proposition matches the household’s economic situation and intended use.

TANRISE application

Define the specific improvement each product makes in the customer’s life. Avoid describing every project with the same lifestyle vocabulary.

Jaya Real Property: Turning connectivity into a usable service

DOCUMENTED EXECUTION

JRPT’s sales material describes connections to commuter stations and internal InTrans shuttle services. Its earlier annual report also explains a strategy of selectively leasing commercial land to quality tenants to generate recurring income and improve area value. Sources: FY2024 sales material, 2023 annual report, strategic outlook.

WHY THE MECHANISM MATTERS — ANALYSIS

“Near transport” is a geographic statement. A usable connection is an operating proposition.

Likewise, adding a commercial building is different from attracting an operator that residents use.

Business mechanism

Improve the practical experience of the location › strengthen residential relevance › support commercial demand › retain selected income opportunities.

TANRISE APPLICATION

For Sidoarjo, test actual journeys to employment centres: travel time, cost, service availability, and reliability. For amenities, distinguish committed operators from proposed facilities.

PANI: Coordinating a destination story with multiple products

DOCUMENTED STRATEGY

PANI’s 3Q2025 release connected residential, commercial, and commercial-land sales with the development of PIK2. It identified NICE and the Kataraja toll road as expected contributors to visitor activity and the area economy.

It also disclosed different residential and business-property products rather than one uniform offer. Source: PANI 3Q2025 marketing-sales release.

BRAND STRATEGY — ANALYTICAL INTERPRETATION

The destination identity gives otherwise different products a common story about where activity and development are concentrating.

BUSINESS MECHANISM

- Access can improve the location’s usability.

PANI: Coordinating a destination story with multiple products

- Events can introduce visitors and businesses.
- Residential occupation can support everyday commerce.
- Commercial activity can strengthen the proposition for subsequent development.

> Critical qualification

Event attendance is not equivalent to permanent occupation, sustainable tenant turnover, or collected property sales.

TANRISE APPLICATION

Build an activity model for each destination: who comes, why, how often, and what they spend.

PANI: Strong destination branding does not remove demand risk

DOCUMENTED COUNTER-EVIDENCE

The same 3Q2025 release reported a strong quarterly sales increase but also reduced the FY2025 marketing-sales target from Rp5.3 trillion to Rp4.3 trillion.

That is a reduction of approximately 19%, despite the destination’s visibility and development activity. Source: PANI target revision and quarterly results. Percentage is calculated from the disclosed targets.

WHY THIS MATTERS — ANALYSIS

A high-profile brand can generate attention while buyers remain constrained by confidence, affordability, timing, or investment appetite.

RESEARCH IMPLICATION

Do not treat a strong quarter, social visibility, or a major opening as proof of permanently stronger demand.

TANRISE application

Build downside scenarios into the 2035 plan. Link expansion commitments to collected sales and verified operating demand.

The most useful combined strategy for TANRISE

PROPOSED DIRECTION

Strategic problem	Most relevant lesson	TANRISE application
Insufficient land pipeline	Ciputra	Build a credible land-partnership proposition
Product affordability	Lippo	Start with household finances and redesign accordingly
New-location uncertainty	Summarecon	Use delivery evidence and credible project phasing
Need for permanent activity	BSDE and JRPT	Connect housing to work, services, and practical access
Underproductive retained assets	Pakuwon and APLN	Review the operating proposition and capital productivity

The most useful combined strategy for TANRISE

Strategic problem	Most relevant lesson	TANRISE application
Missing specialist capabilities	DUTI	Partner selectively, with clear accountability
Different buyer financing needs	ASRI	Adapt payment and sales processes by segment
Destination visibility without assured demand	PANI	Separate attention from sustainable economic activity

CENTRAL RECOMMENDATION

TANRISE’s corporate brand should express a standard it can deliver repeatedly. Each existing project should then present a specific customer proposition supported by product, access, services, price, and delivery.

The most useful combined strategy for TANRISE

Preserve existing project names. A clearer strategy does not require a wholesale renaming programme.

What a genuinely deeper competitor audit should measure

Public sources establish many actions, but the following evidence is needed to judge effectiveness more precisely:

Question	Evidence required
Does the brand command a premium?	Comparable transaction prices adjusted for location, specification, and payment terms
Which channels create customers?	Qualified leads, visits, signed sales, cancellations, and collections by source
Do launch events create durable demand?	Subsequent cancellations, mortgage approvals, and completed handovers
Do amenities improve housing performance?	Matched sales comparisons before and after opening, with other changes considered

What a genuinely deeper competitor audit should measure

Question	Evidence required
Are promotions profitable?	Net realised prices, incentive costs, commissions, and cash timing
Do destinations create recurring activity?	Repeat visits, weekday usage, tenant turnover, occupancy, and operating cash flow
Can expansion be repeated?	Project returns, delivery consistency, management capacity, and funding needs

PROPOSED NEXT LAYER OF TANRISE RESEARCH

Use this framework to examine a small number of directly comparable projects in greater detail, including site observation, buyer interviews, product and payment comparisons, and operator discussions.

Research standard

A strategy is effective when it produces economically valuable customer behaviour at an acceptable cost—and the company can repeat it.
